ARRIVAL OF THE NIAGARA AT HALIFAX.

CONDITION OF THE ATLANTIC CABLE

ARRIVAL OF THE CHINESE TREATIES.

INTERESTING FROM INDIA AND CHINA.

[By the American Telegraph Company's Lines, office No. 21 Wall-st]

HALIFAX, Wednesday, Sept. 22.

The royal mail steamship *Niagara*, Capt. MILLAR, left Liverpool at 10½ A. M. of the 11th, and arrived at Halifax on the morning of Wednesday, 22d. She reports having had good weather. Sept. 11, at 2½ P. M., passed the *Arabia*, from New-York, bound in.

The steamers *City of Washington* and *Nova Scotian* arrived at Liverpool on the evening of the 9th.

The American ship *J. J. Hathorn*, bound from Liverpool to Cardenas, and the bark *Margaret*, came in collision at the mouth of the Mersey on the 9th. The latter vessel sunk, and all on board were drowned except the Captain and Pilot. The damage to the *Hathorn* was slight.

The *Times* City Article says the condition of the Atlantic Telegraph is unaltered. The signals continue to be read, but are too uncertain and faint to be intelligible. Occasionally a short word is given, but never anything approaching to a sentence. The experiments made still lead to the belief that the injury is near to the coast, probably within two or three miles. The strong portion of the cable manufactured expressly for the shore end, has been shipped from Plymouth for Valentia, and will be substituted immediately on its arrival for the ordinary wire, which, however well adapted for undisturbed depths, is totally inadequate to resist liability to accident upon a rocky coast.

The *Times* Plymouth correspondent telegraphed on the 9th that instructions had unexpectedly arrived from Ireland for suspending the embarkation of the Valentia shore end of the cable on board the steamship *Belda*, which vessel was to receive it.

The Liverpool *Post* says that electrical experiments have proved beyond a doubt that the defect in the cable arises from leakage at a distance of two hundred and forty miles from land.

The Directors were to meet in London on the day the *Niagara* sailed, to discuss future action. The shares fluctuated from four hundred and eighty to five hundred and twenty pounds, with numerous transactions.

The first installment of fifteen per cent. of the Turkish loan was met with remarkable promptness.

PARDOE, HOOMANS & Co., carpet manufacturers, at Kidderminster, had suspended; liabilities, £80,000 to £100,000.

The British Board of Trade had directed an inquiry into the circumstances attending the wreck of the American ship *Abby Langdon* off the Isle of Wight.

The comet had been distinctly visible to the naked eye in various parts of England.

Negotiations for the establishment of mail services to Australia and British Columbia by the Panama route, were still under the consideration of the Government.

The whole of 5,000 reinforcements of cavalry and infantry recently ordered to India had been dispatched.

The London *Gazette* contains a notification that a convention was concluded between Great Britain and Brazil on the 23d of June last, for the settlement of the outstanding claims of the subjects of the two countries upon the opposite Governments by means of a mixed commission.

Eighteen English Railway Companies, representing a capital of one hundred and fifty millions sterling, had held a meeting in London for the purpose of agreeing upon a course of procedure to avoid further misunderstanding. Among other resolutions adopted was one strongly recommending the settlement of all difficulties by arbitration, instead of law; to prevent ruinous competition, and asking that powers be sought from Parliament to enable the Companies to settle all disputes by arbitration.

The *Daily News* understands that the European and American Steam Company have effected a reconciliation with Messrs. CROSKEY & Co., on satisfactory terms.

A correspondent of the *Times*, who has a good official experience of the feelings of the Chinese, has strong apprehensions that, if the payment of the war indemnity, which is rumored to have been fixed at £3,200,000 for England, and £1,200,000 for France, is allowed to be left dependent on the collection of the customs at Canton, not only will its receipts be "problematical," but there will be a constant recurrence of disputes.

The forcible abduction by the Roman Inquisition of a Jewish child at Bologna, under the pretence of its having been secretly baptized by its Catholic nurse, had created a most painful sensation throughout the Jewish world.

The Jews of London had taken the matter up, to enlist the sympathy of the English Government, and if need be send a deputation to the Pope.

The monthly Bank returns show an increase of cash in hand in Paris of 22,500,000 francs, and in the Branch Banks of 10,000,000 francs.

The *Times* correspondent is assured that the French Government have decided to apply free trade to Algeria, and that all the ports on that coast are to be declared free.

MORPHY, the American chess player, was beaten by HARRWITZ in their first trial, after three hours' play, in Paris.

The French Press has been interdicted from publishing any portion of the will of the Duchess of Orleans.

The Paris *Presse* had published it, minus its political passages.

The Emperor and Court continues at Biarritz.

The Paris *Presse* speaks of the necessity which exists for France to lay down a telegraph to the United States if she wishes to maintain, undiminished, her present commercial relations with the American continent. It declares France is now too dependent on England for her communications with America.

PARIS, Friday—The Three Per Cents closed at seventy-two fifty-five.

The Madrid journals say that the decree for the dissolution of the Cortes has been recently signed.

At Vienna, Austria, paper currency had recovered to its par value.

The letter addressed by the Emperor of Austria to VICTORIA upon her visit to Germany, is said to have produced a very agreeable impression, and to have greatly pleased the Royal Family of Prussia.

At Berlin the letter is thought likely to lead to a better understanding between the Prussian and Austrian Courts.

It was said to be definitiely settled that a submarine telegraph should be constructed from Ragusa to Alexandria.

It was rumored that the Pope intended to visit the Holy Land.

Negotiations were going on between Rome and Russia for settling the religious situation of the Kingdom of Poland.

A St. Petersburg telegram of Aug. 31 says that a great explosion took place on the morning of that day at some powder mills in the vicinity of the city, by which it was feared that several hundred lives would be lost. A subsequent dispatch says the explosion was at Okhta, and one hundred workmen were killed.

The Emperor has ordered the foundation of a new town on the confluence of the See and Amoor rivers.

A telegraph from St. Petersburg reports a reaction in the tallow market, after the speculative rise which has lately prevailed, the tendency of prices falling.

Hundreds of houses had been burned at Moscow by clandestine makers of lucifer matches.

The forests were still in flames on the 1st of September, and the smoke was intolerable in St. Petersburg.

A peat bog was set on fire by the unusual heat of the sun.

The report that the port of Villa Franca is ceded to Russia for a term of years is confirmed. Russia has now accomplished her object of having a naval station in the Mediterranean. It will consist of one ship of the line and three frigates.

The Austrian *Gazette* says that it is reported in Montenegro that the eldest son of MIRKO PETROVITCH, Prince DANILO's brother, is to take the reins of government, to acknowledge the supremacy of the Porte, and to have a seaport. An armistice is concluded until the 31st December next, between the Porte and Montenegro.

The 100th Regiment, recently raised in Canada, is expected to be ordered to India soon.

The *Daily News'* City Article says that the Funds on Friday, at the opening, experienced an unfavorable reaction of ⅛ per cent., but that in the afternoon renewed firmness was shown, the closing quotations being the same as those of Tuesday.

The accumulation of precious metals in the Bank of France is the largest ever known, and upwards of £600,000 in Australian gold is now off that coast, and will be sent into the Bank.

The *Avon* has arrived off Falmouth from Melbourne with 107,000 ounces of gold, worth £488,000. This supply will be sent into the Bank. £185,900 in Austrian gold by the *Hougoment* and *Teviot* will be delivered Saturday, and will also be sent into the Bank. The recent rise in Funds continue to be well maintained. In Foreign Exchange, this (Friday) afternoon, rates for Amsterdam and Hamburg were slightly higher. For other places they were the same as last post. Final quotations of the French Three ₧ Cents. show a fresh advance of nearly three-eights ₧ cent. The amount of gold taken to the Bank was $44,000.

FROM WASHINGTON.

Interesting Advices from the African Squadron—The Damage to the Baltimore Custom-House—Receipts at New-York—Return of the President to Washington—Minister Forsyth, &c.

Special Dispatch to the New-York Times.

WASHINGTON, Wednesday, Sept. 22.

Advices have been received from the African Squadron up to the 17th of August. The flag-ship was bound down the coast. The *Release* had arrived at Porto Praya with stores for the squadron; also, the *Suwannee*, both for Boston.

A Naval General Court Martial, extending over two weeks, had been held on board the *Dale*, for the trial of Past Assistant-Surgeon SHERMAN. The Court was composed of Captain MISROON as President, and Purser CUNNINGHAM as Judge Advocate, with Captain PARKER and Lieutenants WARDEN, BARRAUD and CAMPBELL as members.

The *Dale* had been ordered to go to the Bights of Benin and Biafra. The *Vincennes*, *Marion* and *Bainbridge* were down the coast.

Lieutenants WINDER, DALLAS and CAMPBELL, and Surgeon ENGLES, had reported for duty on the *Dale* to fill up the complement, which had been reduced by death.

The square blue flag at the mizzen, instead of the broad penant at the main, was hoisted on the *Cumberland* on the 2d of August, and saluted.

The dépot at Porto Praya is being supplied with excellent articles and always, in good time, by the Bureau of Provisions and Clothing.

The invalids of the squadron were brought home on the *Release*, which has arrived in Boston. W. W. THACKER, landsman of Boston, sentenced to two years' imprisonment in the Penitentiary at Washington, also arrived on the *Release*.

Secretary COBB returned, yesterday, from Baltimore, where he inspected the damage done to the Custom-House by the late fire. He thinks five thousand dollars will repair it and replace the furniture.

The Custom House at New-York received $200,000 on Saturday, $196,000 on Monday, and $180,000 yesterday.

The President returned, last evening, in fine health, and held a Cabinet meeting to-day.

Postmaster-General BROWN will leave, this evening, with his family, on a "shopping" excursion to Philadelphia and New-York.

Captain HENRY, who went out as bearer of dispatches, is here, and says that Mr. FORSYTH will leave Mexico about the middle of October.

The *Star*, this evening, contains a severe letter from Hon. JOHN S. PENDEETON, in reply to one from General JESUP. Q.

[FROM THE REPORTER FOR THE ASSOCIATED PRESS.]

WASHINGTON, Wednesday, Sept. 22.

On information received through the State Department, that the mutineers of the ship *Tartar* are at Sal, one of the Cape de Verde Islands, the Secretary of the Navy has transmitted instructions to the flag-officer of the African Squadron to send them to the United States for trial.

A private letter from an officer on board the sloop-of-war *Dale*, dated Porto Praya, Aug. 17, states that the health of the African squadron generally is good. The *Dale* had sailed for a cruise off the southern coast of Africa, and was to return in December. A seaman was sent to the United States as a criminal, and Surgeon SHERMAN was dismissed from the squadron by Court Martial.

The visit of the Postmaster-General to New-York has reference to the selection of a site for the Post-Office there.

An Unknown Steamer on Fire at Sea.

HALIFAX, Wednesday, Sept. 22.

The ship *Rosenheath* from Glasgow has arrived here, and makes the following report: "On Sept. 15, lat. 45° 12′, lon. 41° 48′, passed a large red-bottom steamer on fire; an hour before saw a bark pass close alongside of the steamer; came up with the bark four hours after, and found her to be the *Arabian*, of Glasgow, for Halifax.

She reported that there was no person on board of the steamer. The steamer appeared to be of American build, and had a very short bowsprit. Her engines worked through the upper deck, and a large beam above the deck was still standing. Could not learn her name, as a strong Northeast gale was blowing at the time."

Later from Utah.

ST. LOUIS, Wednesday, Sept. 22.

Leavenworth advices of the 19th state that the Salt Lake mail had arrived in twenty days' passage. BRIGHAM YOUNG still remains housed, though it is supposed that no harm would be done him. Everything was peaceable between Gentiles and Saints, though the latter still keep a strict guard upon their women.

The troops at Camp Floyd are all well. General JOHNSTON intends Wintering there, and the men are now building huts. The Indians are quiet.

The State Temperance Convention.

ALBANY, Wednesday, Sept. 22.

The State Temperance Convention was held, pursuant to the call, at Utica to-day. JOHN FOOT, of Madison, presided.

On motion, the following preamble and resolution was unanimously adopted:

Whereas, Owing to the informality of the call, signed by but six out of the sixteen members of the State Temperance Committee, the lateness of its publication, and its being published in but one temperance paper, it has been impossible for the Assembly Districts of the State to be represented at this time, and the short time previous to the election now precludes the possibility of efficient organization; therefore,

Resolved, That in our opinion it is inexpedient to organize at this time, and the State Temperance Convention for the year 1858 is hereby declared adjourned *sine die*.

INTERESTING SCENES AND INCIDENTS.

From Our Special Correspondent.

TIEN-TSIN, Wednesday, June 9, 1858.

This would be a dull place but for the temporary interest which attaches to it as the pivot on which revolves the destiny of China.

The arrival of four Legations, each clothed with plenipotentiary powers, and accompanied by a military force, would excite no little commotion in the first capital of the world. And here, where the smoke of a steamer was never seen before, and where foreign Ministers never passed, but on two occasions, (and then in Chinese junks,) the effect is overpowering. It is too deep for the ordinary manifestations of curiosity. While the novelty of the scene draws crowds to the river banks, no smile of agreeable surprise lights up their features. Fear combines with wonder and fixes their gaze on our foreign fleet with a kind of painful fascination, not unlike that with which a bird gazes on the glittering folds of its charmer. Consternation seized them on the approach of the first vessel. Shops were closed, families fled, and the city was almost deserted by one of the sexes. Nor are they, as yet, reassured, though now and then we meet a cart loaded with pale, emaciated females and starving children, resolved to perish by the sword of the barbarian rather than endure the miseries of flight.

The sudden irruption is beginning to assume something like the appearance of a quiet occupation. The four Ministers, like the lovers of PENELOPE, are bent on making themselves as comfortable as possible, while their suit is pending, and in their arrangements consult the wishes of the people about as much as the rival suitors did those of Telemachus. Lord ELGIN and Baron GROS occupy a temple which has been distinguished as the temporary abode of Imperial Majesty. The American and Russian Ministers are domiciled in the mansion of a wealthy merchant. Displaying less of magnificence, it affords far more of real comfort. The part occupied by Mr. REED and his suite is the *Summer* residence of this rich Oriental. As a specimen of its kind, it is worth describing.

In keeping with the law of contrariety extending to all things Chinese, it incloses a garden instead of being surrounded by one. The winding paths are bordered with flowering shrubs, and fruit-trees of various kinds raise their heads above the roofs of the adjacent buildings. In the rear rises an artificial mountain, erected from rocks imported from the confines of Tartary. Its summit is crowned with a graceful little dome, which is reached by arched pathways. Stunted cedars strike their roots into its ragged sides, and its base is washed by the waters of a diminutive lake. This embraces a circular bower, and is spanned by an arched bridge. Above the front suite of apartments, overlooking the river, is a flat roof, furnishing a pleasant promenade, and a neat pavilion, which testifies, by the verses inscribed on its walls, that it is consecrated to Bacchus and the Muses. All the apartments are faced, towards the garden, with trellis-work, lined with transparent paper. And one, distinguished by its dais, encircled by wreaths of bamboo carvings, as the guest-chamber, is furnished with the luxury of a glass. The floor is of brick, and underneath are furnaces, designed as a defence against the rigors of Winter, which are usually very severe. One thing by which, perhaps more than anything else, the eye of a stranger is arrested, is the painted globes of transparent horn, pendant from the boughs of trees and the pillars of the corridor. These are lanterns, and when lit with crimson tapers of vegetable tallow, the *coup d'œil* is one of peculiar brilliancy.

Our Minister pays for these lodgings a hundred and fifty dollars per month—a round sum, you will sav, which proves that John Chinaman in the exercise of hospitality is not forgetful of self. But in truth our comfortable quarters were obtained by neither love nor money. The lord of this domain actually offered no less than $6,000 to secure it from the pollution of barbarian feet. But his money was regarded as little as his wishes. The Russian Minister had applied to the Mandarins to secure lodgings for the American and Russian Legations. The concourse of officers from Pekin just now being unusually great, all the public buildings were preoccupied, and the Mandarins accordingly placed their seal on the door of this establishment, bidding the owner remove the fainting inmates of his zenana and complain to the winds. Fortunately his buildings are so extensive that after accommodating both Legations he still has room to house his family, and the ladies probably suffer no other inconvenience than the want of their accustomed walks among the birds and flowers.

On the 1st inst., cards were received from the new Commissioners expressing a desire to meet the envoys of the Four Powers in a joint interview. Lord ELGIN and Baron GROS had steadily refused to meet their predecessors, because they were not plenipotentiaries. They maintained that they were clothed with as full powers as the Emperor is wont to confer on any of his Ministers, and that the appointment of a Minister Plenipotentiary is incompatible with the authority of an absolute Sovereign. The cogent arguments adduced by the allies on the 20th ult. appears to have reconciled these conflicting ideas, and KWEILIANG and HWASHANA announce themselves in borrowed phrase as "Ministers Plenipotentiary, and Envoys Extraordinary of the Yatsing empire." This is a title unknown to Chinese diplomacy, and it is an omen for good to see conformity to Western usage even in a name. In the present case it is nothing more, except that the condition of the empire being more critical than it was when the allied forces were lying at the "outer anchorage," they are perhaps authorized to concede points which their predecessors were not allowed to discuss, and if the allies were to march upon Pekin other commissioners would be appointed with powers to yield many things which are now *tabooed* to these so-called Plenipotentiaries.

They are men of fragrant names, KWEI signifying *cassia*, and HWA, *flower*. They are both Bannermen, or Tartars, closely attached to the interests of the reigning family. The latter is Secretary of one of the Six Boards, and the former is one of the four Ministers of State. He is an elder brother of the late Viceroy of Kiangnan, and as full of years as of honors, being now in the seventy-fourth year of his age.

In order to avoid unpleasant questions of precedence, it was deemed best to decline the proposition of a joint interview. The allies having the most urgent questions in dispute, their Ministers were to have the first meetings with the Imperial Commissioners.

The time for Lord ELGIN's reception was fixed at 3 o'clock P. M. on Friday, the 3d inst. At the appointed hour his Lordship proceeded to the interview, with an escort of marines and a full military band. The display would be surpassed on a parade-day in any of our considerable towns, but here it was a spectacle never before witnessed. The *nil admirari* disposition of the natives was fairly moved, and every street and lane was jammed with spectators. With the populace such exhibitions serve to keep up the impression made by the late battle, but with the higher officers they inspire neither fear nor respect. Indeed the Chinese Commissioners appear to have regarded the military display on this occasion as hardly in good taste, or suitable to a friendly meeting of civil functionaries. A mandarin, whom I asked what the Commissioner thought of his Lordship's *cortège*, replied, "They say that *their* dignity does not stand in need of military pomp."

The next day being marked in the Chinese calendar as unlucky, the reception of the French and Russian Ministers was accordingly deferred until Sunday, and it is to be regretted that they did not, by a further postponement, embrace the opportunity of impressing the Chinese with the sacredness of the Christian Sabbath.

Baron GROS' *cortège* was still larger than that of Lord ELGIN. Count PONTIATINE, whose interview with the Commissioners followed that of Baron GROS, was unattended by any military escort. No business was transacted on any of these occasions except the exchange of credentials.

The reception of our Minister took place on Monday morning at 6 o'clock, rather an inconvenient hour for those who require a breakfast to fortify them for the fatigue of business. The place of meeting was an old convent, situated in a dusty plain about half a mile from the city walls. When we arrived, the Chinese Ministers were already in waiting, and receiving Mr. REED as he descended from his sedan, conducted him to a seat placed between their own at the principal table. Of all the Chinese and Tartars present, they only were allowed to be seated. The chief Commissioner, KWEILIANG, is stooped with age, and a little deaf, but the lustre of his dark eye indicates that he retains much of his mental vigor, and his features bear the impress of a benevolent character. His colleague, who is just twenty years his junior, is erect and martial in his figure, and has, by general consent, the marked features of OLIVER CROMWELL.

After the usual compliments, Mr. REED requested to see the Imperial edict by which they were commissioned to negotiate. It was produced by KWEILIANG who, raising it reverentially above his head, slowly removed the yellow wrapper, and placed it in his hands, at the same time furnishing a copy for the archives of the Legation. Mr. REED in turn exhibited his own credentials, and furnished a copy. This done, Mr. REED handed to his interpreter, Mr. MARTIN, a paper reviewing his own course with reference to Chinese politics and defining his present position. This was read to the Commissioners in Chinese, and some points made the subject of further inquiry and explanation. It was agreed to refer the consideration of the amendments proposed in the treaty to deputies, and that the Ministers should only meet to sign and seal the document when it should be completed. Mr. REED appointed Dr. WILLIAMS, and inquired who the Chinese Commissioners would appoint to meet him. KWEILIANG named PIEN, his Secretary, a shrewd, thin-visaged, thoughtful man, who has figured largely in the present negotiations. It was objected that, wearing only a crystal button, he was not of sufficient rank to be pitted against the second man in our Legation. KWEILIANG then named CHANGTAJIN. Hearing himself called, a short, thick, bull-necked Tartar stepped out from the herd of Mandarins with the air of a bashful school-boy. There was no gleam of intellect in his countenance, but a red ivory button blushed on the top of his cap. One of the Mandarins also announced that he was a *tsze*, or hereditary Viscount. With such a weight of dignity it was easy to excuse the want of brains. No further objection was made, and Mr. REED merely hinted that he would not be displeased to see PIEN associated with the Viscount. Expecting that the deputies, each acting under the instructions of his superior, would in the meantime agree on the matter of the new treaty, Mr. REED proposed to meet the Imperial Commissioners for the purpose of affixing their signatures on Thursday. But this was another unlucky day! The Commissioners objected to it, and the meeting was deferred till Friday—Mr. REED not choosing to object to Friday as an unlucky day with the superstitious among us. No answer having been received to the President's letter, Mr. REED said that he should expect the Emperor's reply to be delivered at the next interview, and took leave.

Besides his immediate suite, Mr. REED was accompanied only by a small guard of marines.

The Imperial Commissioners exhibited nothing of oriental pomp either in their personal apparel or other arrangements, and all the circumstances of the meeting were characterized by a dignity and decorum which would do credit to a diplomatic interview in any country.

TIEN-TSIN, Wednesday, June 16, 1858.

A few days ago we were startled by a mandarin coming in with KEYING's cards and compliments. Now that communications from dignitaries in the Spirit-land have become so common, and seeing too that those revelations are better known and more firmly believed in China than in the West, just in proportion to the higher civilization of its inhabitants we were almost betrayed into the illusion that a departed statesman had sent us his card by way of reminding us that his spirit is not uninterested in the present crisis of his native land.

But, whatever we might have imagined, our dreams were forestalled by the announcement that KEYING had arrived in person—not from Hades, but from Peking,—that he was to take part in the pending negotiations, and that he would do himself the pleasure of calling on the American Minister on the next day at 10 A. M.

No man of the present age has performed a more conspicuous part than KEYING in the international politics of China and the West. He negotiated the treaties with England, France and the United States. He acted for three years, as Governor-General of Canton and Kwangse, when the new *régime* was first inaugurated. His portrait is used as a frontispiece to a volume of *Williams' Middle Kingdom*, by far the ables work yet written on the Chinese Empire; and his name is better known throughout the world than that of any other Chinese not of Imperial dignity. In Chinese politics he long stood forth as the Coryphæus of the progressive school; and during the reign of TOON-KWANG he had a great influence in reconciling the Emperor to the altered relations of China and foreign countries. But an adverse influence was also at work, and with the accession of a new monarch, the storm which had been slowly gathering, burst on the head of the aged Minister.

The young Emperor HIEN-TUNG knowing little of the stern necessity to which his father had yielded, regarded with indignation concessions so derogatory to the supremacy of China; and vowing to rebuke them all, resolved first to pour his vengeance on the instrument through whom they were granted.

Though KEYING had served both his grandfather and his father, and had been one of the guardians of his own tender years, none of these considerations excited his compassion. Inflamed with jealousy for the tarnished honor of his house, and suspicious of the powers which had obtained a foothold on the borders of his realm, he saw in KEYING only a traitor, who had sacrificed the interests of his country, and decreed his ruin, not only without remorse, but with circumstances of studied insult. Nothing can portray the animus of the young Emperor, as well as the language of his own edict. "As for KEYING," he says, in announcing the degradation of that faithful old Minister, "his unpatriotic and pusillanimous conduct is to us a matter of unmixed astonishment. When he was at Canton, he seemed only anxious to make our people subserve the interest of *foreigners*. Is not this evident from his proposing to throw open the gates of that city, whereby he violated the principles of Heaven, outraged the feelings of men, and all but introduced a series of *innovations*, the results of which it is beyond human power to divine? Recently, during a private interview, he spoke to us of the English, how greatly they were to be dreaded, and strongly urged a mild and conciliating policy—supposing that we were not aware that his knavish object was merely to secure rank and emolument for himself.

Oh! how degraded is he! The more he speaks, the more do we discover this, so that at last we have the same contempt for him that we have for a wild, yelping cur."—(Peking *Gazette*, 1850.) Stripping him of his honors, he dismissed him with a kick. KEYING retired into private life, and for several years he has been reported as dead. Whether he descended into the vale of obscurity, breathing the prayer of ARISTIDES, that his country might never need his aid, or that of the other Greeks, that the calamities of the State might soon compel the people to recall him, we are not informed. But we know that a crisis did come in which the Emperor felt the want of his discarded servant. He was pitched upon as the fittest man to fill the widening breach, and he has fallen already a victim to the cause. His reputation, his age and his sudden vicissitudes, impart an unusual interest to his history, and furnish my apology for dwelling at some length on his unexpected reappearance and mysterious exit from the diplomatic arena.

On the morning of the 10th inst., he called on our Minister. He is 72 years old, and apparently quite superannuated. His senses are failing with age; his sight and hearing are both much impaired; and his voice is said by those who know him to be thick and indistinct, compared with what it was 15 years ago. He seems, too, to have retrograded somewhat in his notions of our international relations. He informed Mr. REED that the Emperor's reply to the letter of the President had been received, and that it would be delivered at the interview of the next day. It would be a joyful day, he said, for our country when an epistle from his August Master should be delivered to us for our President. In order to secure a proper degree of respect, and prevent the occurrence of anything ludicrous, it would be necessary to have an understanding as to the ceremonial to be used on the occasion. He accordingly proposed that Mr. REED should go through a pantomime or rehearsal preparatory to the part he was to act. Mr. REED, of course, declined, merely saying that he was ready to hear what KEYING would expect of him. "But are you not going to receive the letter on your knees?" "No," said Mr. REED. "We kneel only to the Lord of Heaven." "But our great Emperor is equal to Heaven." "I will receive it standing." "Then you must raise it above your head as a token of respect." Mr. REED cut short the discussion by declaring that he would receive it with no other forms than those with which Commissioner YAN had received the letter of our President.

On the next day (the 11th) at 12 o'clock, Mr. REED proceeded with his suite and escort to the Haikwangsze, to meet the Imperial Commissioners. As we approached, the aspect of the place appeared very different from what we had seen it before. There were the same dingy walls, but they were transferred by some magic power to the margin of a silvery lake, whose waters flashed in the beams of the noon-day sun and whose bosom was dotted with the islets of emerald green. The shadows of the trees were distinctly visible, and nothing but the memory of the dusty plain we had previously seen in that direction appeared to remind us that the beautiful scene was not a reality. It occurred to me that the name Haikwangsze, the Convent of the Sea of Light, was selected with reference to this phenomenon, which in bright sunny weather is always visible. The two syllables, "Haikwang," Sea of Light, aptly indicate in a single word both the appearance and its cause. This deceptive mirage serves the contemplative inmates of the convent as a memento of the chief tenet of their philosophy, that all things are unreal, and that human life is but a shifting phantasmagoria of empty shadows.

On descending from his sedan, Mr. REED was conducted by KWEILIANG to a table curtained with yellow satin, and on which, sustained by an elevated frame, lay a bamboo tube of the same imperial color. That was the long-expected letter. The Mandarins eyed it with awful reverence, and spoke of it with suppressed voices. Mr. REED thought they were going to ask him to kneel, and again proposed the form with which the President's letter had been received. To this they assented, and KWEILIANG raising it in both hands placed it in those of Mr. REED, who respectfully elevating it, gave it in charge to his son. The parties were then seated—Ex-Commissioners YAN and YSANG, whom Mr. REED had refused to meet until the arrival of the Emperor's letter, being now present. Commissioner YAN still wore his coral button; but he bore a mark of the Imperial displeasure in being deprived of his two-eyed peacock's feather. He looked a little crestfallen to be cast in the background, but no doubt congratulates himself that he is no longer charged with the office of negotiator. He has lost his Pavonian plume, but his head is safe, which is more than can be said of KWEILIANG and HWASHANA.

Mr. REED was informed that KEYING had, by a decree just received, been appointed Plenipotentiary and assessor with KWEI and HWA. In answer to Mr. REED's inquiry, Whether they wished him to retire as soon as his treaty should be signed? they replied that they were very desirous that he should remain at Tien-tsin, and use his influence to bring the difficulties with the English and French to a happy conclusion.

On the following day (Saturday) Mr. REED called, according to appointment, to return the visit of KEYING. He was received at the Fung-shin-Miaon, or Temple of Æolus. Mr. REED congratulated KEYING on his promotion to the dignity of Minister Plenipotentiary. KEYING, after thanking him for his courtesy inquired if he was not pleased with the praise which the Emperor in his letter bestows on our President. Mr. REED replied by asking if he had a copy. He said he had, and promised to furnish a duplicate. He felt very much flattered to learn that his portrait was in Dr. WILLIAMS' *History of the Middle Kingdom*, and expressed a desire that a copy might be sent him by the messenger whom he would send the next morning with the copy of the letter.

On Sunday morning the messenger came, but he brought no letter, and informed us that KEYING had just been summoned to the Capitol. We supposed he was called to receive some special instructions relating to the management of Foreign affairs; but to-day we are startled by the intelligence that the old minister had no sooner reached Fungchau, within twelve miles of Pekin, than his master commanded him to be *put under arrest* and *tried on a charge of treason*. So precarious are Oriental honors! He wore the title of Plenipotentiary only four days—is now in prison, and is likely to die on the scaffold or in banishment. His crime is not precisely known, but it is strongly suspected that it was that of too much fidelity. He has probably on this occasion, as before in his memorials to the Throne, "Spoken of the English, how greatly they are to be dreaded, and urged a mild and conciliatory policy;" and again, perhaps, for telling the truth—and giving good counsel he is spurned like a dog from the foot of the Throne.

If this be the case, it augurs ill for the disposition of the Emperor. The demands, however, not only of the neutral Powers, but of those who might dictate their terms at the cannon's mouth, are so moderate, and the peril of rejecting them so imminent, that he will hardly dare refuse to ratify our treaties. But if compelled to yield, he has the despot's resource, of venting his displeasure on his innocent ministers.

FRIDAY, June 18, 1858.

The work for which our minister left his native country is finished to-day—the task which has cost him days of toil and nights of anxiety is done. The New Treaty was signed by the Plenipotentiaries of both Powers this day at 6 P. M., at the convent of Haikwang, and is henceforward to be denominated the Treaty of Haikwang. One year is allowed for the exchange of ratifications. Its provisions are in all respects as liberal as a neutral nation could expect to obtain from the Chinese by dint of negotiation. And right glad am I as an American that in this instance our Minister is not found following in the wake of the English. Such results as he has reached he has achieved independently. They may not be as large as those obtained by the English; but they are the utmost that could be obtained by diplomacy, unaided by force or threats. The Russian Treaty was signed last Sunday evening. The French is nearly agreed upon. But the Chinese still have some serious points of difference with the English; and it is by no means certain that they will not lead to a renewal of hostilities. If the English press too hard, they will upset the dynasty, and spoil the work we have labored so hard to accomplish.

Rio de la Plata.

Our files of the Buenos Ayres journals extend to July 28, the date of advices previously received by the way of England. On July 2 the District of Saladillo was the theatre of an invasion by a party of Ranquiles supposed to amount to 400 or 500 men, who succeeded in carrying off some 200 mares and 300 head of cattle. The frontier authorities were in pursuit; but for lack of guides acquainted with tne country, the expedition missed the trail, and were obliged to abandon the search.

The Paraguay Consulate at Buenos Ayres, having been suppressed by President LOPEZ, a special Commission was appointed some months ago, to investigate and grant certificates of Paraguayan citizenship; to obviate any inconvenience on the score of military service. This act has given offence to LOPEZ, who has withdrawn the exequatur of the Buenos Ayrean Consul at Ascencion and published a protest against the action of that Government. It is supposed a war of tariffs, if nothing worse, will be the upshot.

The accession of Col. MITRE to the Cabinet as Minister of Foreign Affairs, had produced no change of policy.

The *Tribuna* complains of the heavy duties imposed upon the produce of Buenos Ayres imported in the ports of the Argentine Confederation.

The long continued financial depression had, it was hoped, begun to abate.

The prohibition against the export of horses from Buenos Ayres had been rescinded, and a British officer was contracting for a supply for India.

From Parana, we have dates to the 22d of July.

The law imposing differential duties on export products of the Confederation, had not been taken into consideration by the Argentine Senate; but the general impression was that it would be sanctioned, and parties in and around the Rosario were acting anticipatively on that belief.

The tariff thus established is as follows:

ART. 1. From the 1st of January, 1859, the products designated in this law, and which are exported by the fluvial ports of the Confederation, shall pay on their export the following duties:

I. Copper in bars 6 per cent. upon a valuation of $20 the quintal.

II. Copper, and silver in ore 12 per cent., the value being fixed by assays or other means approved by the Executive Power.

III. Bull, ox, cow or calf hides, 6 rials each; horse hides and sheep skins, 3 rials; slunk, goat and hog skins, 3 cents.

IV. Hair, wool, grease, animal oil, 3 rials the arroba.

V. Chinchilla and nutria skins, ostrich feathers, huanaco, vicuna and sheep skins, bones, horns and horn tips, 12 per cent on their market value.

VI. Jerked and salted beef, 6 rials the quintal, and salted tongues 3 rials per dozen.

ART. 2. The products mentioned in the foregoing article that are exported for ports beyond the Capes, in vessels that have come to ports of the Confederation, shall only pay one-third of the duties established by said article.

ART. 3. The 4th chapter of the Custom-house law, of the 17th December, 1853, is annulled in so far as it may be at variance with the present.

ART. 4. Let it be communicated to the Executive Power.

A late census, said to be made with care, and reported with fidelity, gives 22,000 as the actual population of the Rosario.

The Government had presented a bill to the Chambers, awarding Mr. BUSCHENTAL 10 square leagues of public lands, as a reward for his diplomatic services in the Courts of Brazil and Naples.

We are also informed that the bonds given in favor of foreign creditors, for losses sustained during the past revolutions, are to be received in payment of public lands—a sound and judicious measure, that others might copy with advantage.

A law has been sanctioned by the Senate, authorizing the Government to spend the sum of $54,000 in subsidizing four lines of river steamers, for the term of five years, but without any exclusive privilege.

From Montevideo.

The business news is as satisfactory as could be expected, after the double crisis, political and commercial, to which they were simultaneously subjected about the beginning of this year.

In politics, party spirit runs high, and it is not to be wondered at that some should apprehend a new collision; a fear that may precipitate the danger, whilst in the meantime it chills the ardor of enterprise.

Before closing the Chambers, the late treaties with Brazil were ratified, by an almost silent vote; concealing, it is to be presumed, internal fires, that must sometime and somewhere seek a vent.

The Gold Fever in Kansas.

Lawrence, Monday, Sept. 13, 1858.

Correspondence of the New-York Times:

I have cautiously stayed my pen the past week or two lest I might be guilty of leading an over-credulous public into the dangerous locality of "sham" gold-diggings, so commonly fatal to the healthy growth of society, as proved in the last few years in more than one direction. The papers have already disseminated the fact that gold has been found upon the mountain ranges of western Kansas. This announcement came simultaneously with our late political triumph, also with the greatest scientific triumph of the age, that linked Constantinople and New-Orleans as one commercial family. For these reasons, especially, there has been no necessity for hastening the gold mania among the people of the States. Pike's Peak and Cherry River have already gained an historic name since a few days ago, when they were first written into notice as the field of gold explorations.

Letters have recently been received from several of the Lawrence party now there, showing beyond a doubt that gold exists though all that mountain country. The only point now to determine is, whether it is in such abundance as to make it profitable to wash for it. There are different reports in circulation from different parties upon this matter, still nothing that is directly conflicting, as the authority comes from different localities. Those best acquainted with mining will no longer doubt that about 700 miles West of this place is a tract of country large enough in itself for a State, every way beautiful and fertile, in which gold abounds, along the streams impregnating all the alluvials, and some has been found in the primitive formations upon the mountains. By different tests it has paid from $6 to $30 a day to a man, which is quite equal to the diggings first found in California. The prospecters will multiply rapidly, and it is reasonable to anticipate that the reports will continue to improve the more they explore.

Enough has already been proved to warrant the outfit of new trains from this place, Leavenworth and Kansas city, that will be on the road in a few days, with supplies for a Winter tour. This opens up a new and unexpected field for future Kansas. Should our present anticipations be realized, in less than twelve months the population of this Territory will be double what it now is, and that Western mountain slope will swarm with a colony large enough for a separate State, with all the avenues to wealth and luxury open before them. And for eastern Kansas, can we well draw the picture too bright? Already are our store houses being emptied to provide lading for our out-fitting trains, and it is no longer a question with our farmers where they shall find a market for the surplus from their rich fields.

The last telegram from Washington states that **Samuel J. Jones**, of Kansas, has been appointed Collector of the District of Paso del Norte. This is in keeping with the whole policy of **Buchanan** since his inauguration. The notorious bogus Sheriff and Deputy United States Marshal, who has been foremost in burning private and public dwellings—bombarding towns—throwing printing-presses into the river—robbing men, women and children—stealing horses—chasing Free-State men from County to County with bogus warrants—gambling, and drinking bad whiskey—swearing and fighting with everything he met except a border ruffian—who claims a patent for plotting election frauds, and managing the returns after the Democratic rule, so as to get the largest possible number of votes from the smallest number of voters, is the species of a man that is now nestled in the bosom of the Administration, and paid for all his devotion to their cause by a Collectorship that will furnish him several thousands a year, and enable him to control a large vote in that Southern District. Really, if the crucifiers of the living Christ were now on earth, and should appear before **Buchanan**, under his established precedent he would be overjoyed to endow them as high priests of his evangelical religion. Great is **Buchanan**, and mighty the Federal Treasury.

RANDOLPH.

The Kansas Gold.

From the Leavenworth (Kansas) Evening Journal, 11th.

We have seen some specimens of a gold quartz which, apparently, fully equals in value the richest ever brought from California. The fine gold, obtained by washing, is principally in the form of scales. This is in exceedingly minute particles, and requires care, skill, and proper implements, to collect it thoroughly and successfully. With the inefficient and rude machines, or rather pans, now used by the miners, all save the coarse particles are lost. Yet those who have worked diligently, have thus far realized, so say our informants, an average of *ten dollars a day*. This information comes through various sources, and we do not hesitate to say that it is entirely reliable.

Mr. **King**, who came in the other day, is known to many of our prominent citizens as an honorable gentleman, and one upon whose statements the most explicit reliance may be placed.

We regard it now as a fixed *fact*, beyond cavil or dispute, that we have in Kansas placers of gold, equally as rich as those of California.

It is well known, that from one end of the continent to the other, streams which find their ultimate outlet in the Western Ocean have almost a common source with those that flow towards the Atlantic. The only wonder is that these rich fields on the western slope, to which the experience of California so plainly points, have remained so long unprospected and undiscovered.

This discovery has emboldened some of the most energetic citizens of Kansas to start a line of conveyances from Fort Riley to the gold region. This line will be put in operation as soon as the somewhat extensive arrangements for so large an undertaking can be consummated. We have now a daily line of coaches to Fort Riley, so that in a short time we shall have regular communication with this new El Dorado.

The distances to the new gold region are given by the *Journal*, as follows:

"There are several routes from this point, three of which we give below, as accurate as possible, from the most authentic sources. We are inclined to believe that the route *viâ* the Republican River will be the favorite one, as the Government is engaged in building bridges over all the streams for eighteen miles from Fort Riley, and the supply of wood and water is equal, if not superior, to any other route:

Route viâ Republican River.—Go to Fort Riley, then up the Republican River to near its head waters; thence in a direct line to Fort St. Vrain, *viâ* South Platte River. From Leavenworth to Fort St. Vrain, 720 miles; from St. Vrain to Cherry Creek, 63 miles. Total distance, 783 miles.

Southern Route via Smoky Hill Fork.—Leavenworth to Fort Riley, 130 miles; Fort Riley to Bent's Fort, 430 miles; Bent's Fort to Pueblo, 70 miles; Pueblo to Pike's Peak, 85 miles; Pike's Peak to Cherry Creek, 76 miles. Total, 791 miles.

Route by Fort Laramie.—Leavenworth *viâ* Fort Laramie, 725 miles; Fort Laramie to Fort St. Vrain, 125 miles; St. Vrain to Cherry Creek, 63 miles. Total, 913 miles.

An Interesting Table—Taxes of the Different States.

Washington, Wednesday, Sept. 15, 1858.

There seems to be a great diversity of opinion as to which of the States of the American Union is the most burdened with taxation, and which the least. The question lately arose here in the course of official investigation, and Col. **Wheeler**, of the Interior Department, undertook to prepare a table—the first of the kind, perhaps, ever made—and I am permitted to present, below, the result of his labors. From this table, comprising eighteen of the States, it appears that North Carolina pays less tax, per capita, than either of her sisters, it being only 52 cents for each individual annually—while the tax of the State of Maine, the highest in the list, amounts to $3 per head. The whole eighteen States, with a population of 14,569,722, pay, annually, $25,055,129—being an average of $1 72¾ each.

Taxes *(annual) of* 1850, *(from Homans' Cyclopædia of Commerce. New-York: Harper & Brothers,* 1858;) *with population of* 1850, *and the amount paid by each federal member:*

A Family Celebration in Massachusetts.—The Cushman monument, at Plymouth, was dedicated on Thursday. The bad weather rendered the attendance small, but the exercises were interesting, all those taking part in them being descendants of **Robert Cushman**, the Puritan; prayer by the Rev. **Ruel L. Cushman**, of Orleans; reading of the Scriptures by the Rev. J. F. **Cushman**, of Cahaba, Ala.; prayer by Rev. A. S. **Cushman**, of Orwell, Vt.; address by the Rev. **Elisha Cushman**, of Deep River, Ct.; poem by Dr. **Charles** T. **Cushman**, of Columbus, Ga.; original hymn by the Rev. Dr. **Cushman**, of Boston, and consecrating prayer by the same. There was a dinner at the Samoset House, at which Ex-Lieutenant Governor **Cushman** presided, and several **Cushmans** spoke.

A Screed from the Regulars.

To the Editor of the New-York Times:

Sir: "Sweet water cannot flow from a foul spring," is a trite apothegm. It might with truth also be said, that "Equity and justice cannot emanate from corrupt, unprincipled men." The latter saying has been verified quite recently by the action of the parties belonging to the *soi-disant* "General Committee" now in possession of Tammany Hall, through the grace of *seven Sachems*, elected through the *aid* of **John A. Kennedy**, *Chairman of the Republican General Committee* of this City and County. This Committee called for a primary election and appointed three inspectors for each Ward to *receive votes*, but *not to canvass them*. These inspectors indubitably did the bidding of their *masters*. In the Fifth Ward, where the election was held, the whole arrangement was so farcical that we wondered whether we were in Paris or New-York; whether we were to be impaled upon the glittering bayonets of the Emperor of the French if we voted as our conscience dictated, or not. We cast our eyes toward the "Fifth Ward Museum Hotel," and found of a verity that we were *not* in Paris, but in the metropolis of the "great, glorious, and free" American Union. So we went over to the polls, opposite said hotel, where some dozen office-holders were ejecting their filthy tobacco-juice over the pavement, for the besmearment of virgin crinoline or the calico smocks of the hot-corn venders who issue from Anthony-street and its purlieus every evening at sundown. These dozen office-holders all thrust into my hand, simultaneously, two or three votes. "Let me see which ticket I'll vote," said I. "Vote 'em hall," said Tom, "for they are *hall alike*. There's no *hopposition*." So we went up to the polls with our English *guide*, for we could not have found the polls *without* a guide, and we stuck our arm through a cat-hole (sic) that had been cut through a rough door made of two-inch plank for the occasion. The *votes* were taken out of our hand and ——— what was done with them the inspectors know better than us. Such was the mode of voting at the primaries held pursuant to the call of Tammany Hall. And the *delegates returned* under this farcical proceeding to Syracuse were admitted into the Convention of **Peter Cagger** as the regular delegates of the Democracy of New-York. **Fernando Wood** and his colleagues were virtually ruled out of the Convention as irregular delegates. Thus the Cagger Convention sits upon judgment as to the *regularity* of the New-York General Committees, and decides the Tammany Hall Committee to be the "Simon pure." That decision *must* and *will be reversed* by the *people* at the forthcoming election. *Not* on the State ticket. No, we will try and elect that ticket, and give it the whole vote of the party in this City and County. But on the County officers we will show to the Democracy of the Union that **Fernando Wood** was unjustly ruled out of the State Convention: that the masses still rally around their champion; that he is still their standard-bearer; still the Napoleon under whose banner they ever will rally, and that the Old Wigwam, under the lead of its Billy Bowlegs and Tecumsehs, no longer rides rough-shod over the rights of the people. If it comes to the pinch, we'll "carry the war into Africa" in 1860, provided our *rights* are *not recognized*. How much longer are our Connollys and Pursers, our Busteeds and Browns to have their mouths upon the *public udder?* How much longer are their names to remain upon the "*slate*" of St. Tammany? We will answer. Until that slate is broken *forever*, which will be *this Fall*. The Waterloo of the City Democratic factions *must be* fought, and "now is the accepted time." And it *will be fought*. **John Kelly** will be the People's nominee for Sheriff; **Joseph Rose** will probably be the Anti-Tammany candidate, against **Purser**, the Tammany candidate for Comptroller; **John Clancy** will get the nomination for County Clerk (if he only works in the *right direction*) from the People's or Anti-Tammany Convention, against Assistant-Postmaster **Waterbury**. The result would be the election of the Anti-Tammany ticket. Tammany Hall will be routed, and its warriors (its Bowlegs) translated from their old quarters to a *new one*, viz., from their *banquet room* to their *political graves*. Their *hearts*, now warmed by victory, will then become as gelid as *i-sickles*; their *water-berries* will exhale into *their mists*, and their *fouler fowls* will cackle no more over their incubation, and the urim that shines upon the breastplate of Elijah, their "war-horse" and prophet, will flash no more. In the Third Congressional District General **Hiram Walbridge** will be elected over **Daniel E. Sickles** by a handsome vote. **Fernando Wood** will stump this district for the General as sure as the comet's to be seen every evening in the occident after sunset. It is very evident that the Republicans will elect a majority of both Assemblymen and Aldermen. The Anti-Tammany Hall Councilmanic ticket will probably be elected in three of the four Senatorial Districts, unless the Americans and Republicans unite on a single ticket. The vote at the forthcoming election will not be far from 80,000 in this City and county, of which the following table will not be far from the result:

Anti-Tammany Hall Ticket	29,000
Tammany Ticket	14,000
Republican Ticket	22,000
American Ticket	15,000
Total	80,000

This statement is not a mere hypothesis *based upon no tangible grounds*. We have taken much pains to ascertain the strength of the above parties, and the above is the honest conclusion we have come to, and we beg the reader to *stick a pin* there until after the election. If such then is the result, that the State ticket in New-York City gets a plurality vote of 21,000 over the Republican candidate, and 28,000 over the American ticket, and that Tammany Hall, with all *its patronage*, only gets 14,000 votes towards accomplishing that result, what will the Charleston Convention *do in* 1860, provided two sets of delegates appear at that Convention from this City, one representing 14,000 Democrats headed by **Sickles**, and the other representing over twice that number headed by **Fernando Wood**? Where, then, will **Peter Cagger** be in the next State Convention? Echo answers, "Where?"

That the Anti-Tammany forces will run a separate ticket this Fall, no one doubts; that said ticket will "win," we have also no doubt. If such be the result, **Daniel S. Dickinson** may loom up in colossal proportions in '60 at Charleston.

Yours, A REGULAR.

Punishment for Arson by the Romans.

To the Editor of the New-York Times:

Should you wish to publish the following in your valuable and widely-circulated paper, which always advocates justice and the punishment of true criminals, you may do so:

In reading over the laws compiled by the Decemvirs for the use of the Roman Commonwealth, about the year B. C. 447, I find the following: "Sec. 15. Whoever has burned, or shall burn, designedly and maliciously, another's house, or a stack of corn standing near his house, let him be bound, and whipped at the discretion of the prætor, and burned: but, if he did the mischief undesignedly and without malice, let him repair the damage, or be punished for it by being whipped at the discretion of the prætor." (*Spelman's Dion. Halicar*, book xi., page 329.) This mode of punishment, although a barbarous one for a more barbarous proceeding, was merely their mode of executing offenders, but it shows their proper appreciation of the evils resulting from this great crime. Shall we who live in the Nineteenth Century, with all the benefit of proper education and example, and, withal, by the influence of Christianity, be blind to this crime, and allow it to go unpunished? Shall we be exceeded in justice, and proper sense of virtue and its opposite, by a people just growing up from an infant State, and raising its head above the surrounding more barbarous nations—a community whose only knowledge of right and wrong, justice and injustice, might be said to be instinctive in their minds, or to proceed solely from their experience of what was most beneficial to the majority? Above all, when there are in our case so many harrowing circumstances connected with the burning of the Quarantine Hospitals. Not one house, perhaps empty, or containing but two or three residents, but a number of buildings, devoted to the cure of the sick, and many other humane purposes, and (for aught these savages knew) then sheltering many friendless strangers, in all stages of disease, who, with a barbarity well likened to the fiendish orgies of the Sepoys, (and of which the Roman history of those early days furnishes no parallel,) were driven out to suffer and die, amid the cold damps of the earth and the chill blasts of heaven: and there some have died, and more, in consequence will die. And are all these crimes to be overlooked—the application of the torch; the bald inhumanity of sending out the poor, lingering patient in his last stages, from a comfortable shelter to a bed upon the bare earth, and, lastly, the death of these poor creatures? Oh! if justice meet not such actions, well may our country be compared to all former Republics, slowly moving down the hill to corruption and ruin, and gathering additional strength in each successive revolution!

The Atlantic Telegraph Cable.

There is a want of explanation as to the failure of the Atlantic Cable to transmit signals that is anything at all but satisfactory to the public. First, we are informed by telegraph that the Station at Valentia Bay announced in London on the 6th that communications had ceased. Secondly, the Superintendent at Newfoundland telegraphs to the New-York Directors to-day, that he had not received any communication from Valentia since the 1st, and adds that the electric manifestations continue so as to warrant him in informing the Directors here that the Cable is not broken, and he goes further, and asserts that the obstacle to the current's transmission is in Valentia Bay.

As regards the first assertion we have been led hitherto to believe that the difficulty in receiving rested not with the Valentia but the Newfoundland office, at least I speak from the reports which have reached us through the newspapers. Now the case is reversed. It is Valentia now that does not receive and it is Newfoundland that receives what? Manifestations? What are manifestations? Is it the wrapping up of the simple word signal in such ambiguity that the reading public cannot understand it? Does the Superintendent merely mean that he finds indications on his line of an electric current such as will always more or less accompany a wire, either on land or submerged beneath the waters? or does he mean "manifestations" of an electric current that is passing through the wire and generated by a Daniel's or a Grover's battery, both of which give out electricity from the decomposition of metals when brought into contact with nitric or sulphuric acids? or is it the manifestation that will undoubtedly make itself known by a Leyden jar, such as this cable is conceded to be by most of the learned electricians on both Continents?

As to telling us that the difficulty is near or in Valentia Bay, any practical operator in the City of New-York or in the Union will inform you that if an obstacle exists near to a terminus that terminus has great trouble in receiving but it has less by five-sixths in sending; for example, (bearing in mind that about three-fourths of the current is lost or dissipated in transmission,) when Newfoundland sends to Valentia, the current, from the distance it has traversed, has become weak and is unable to surmount the obstacle it meets with in Valentia Bay. Hence Valentia is unable to catch as much of that current as will record on her instrument there. But not so when Valentia sends to Newfoundland. Her current, strong at starting, will overleap the barrier if near her and still leave sufficient to traverse on unbroken wire and record in Newfoundland.

Now, Newfoundland has not told us that she received "signals," and those signals have never yet been reduced to a definition—and now we are told "manifestations." If there are obstacles let the public know them, and let the genius of either country or either clime have a chance to try their hand at perfecting one of the greatest undertakings of our age.

Terrible Adventure of an Aeronaut.

The Detroit *Tribune* says:

"We have learned full particulars of the balloon ascension at Adrian, on Thursday, its subsequent descent, and its second ascension and runaway with the aeronaut while beyond his control. It is a brief narrative, but of thrilling interest:

The first ascension took place about 9 o'clock in the morning. It was on the occasion of a large Sunday School celebration at Adrian. The balloon was a very large and well-constructed one, being about the height of a two-story building when inflated and ready to cut loose from its fastenings. Messrs. **Bannister** and **Thurston** took seats in the car attached to the balloon and ascended safely and steadily. After remaining about 40 minutes in the air, sailing towards Toledo all the time, they alighted in the woods in the town of Riga, Lenawee County, near Knight's station on the Southern Road, distant about 18 miles west of Toledo. Several men came to the assistance of the adventurers, and they proceeded to prepare the balloon for packing, to be taken back to Adrian.

In doing this the monster balloon was turned over and partially upside down to disentangle the netting and to reach the valve. To do this, Mr. **Ira Thurston** one of the aeronauts, took off his coat, and got astride of the valve-block. He then suggested that the car be detached from the balloon while he should hold it down with his weight. This proved a fearful calculation, for no sooner was the still inflated body relieved of the weight of the car than it shot into the air with the suddenness of a rocket, taking Mr. **Thurston** along with it, seated upon the valve of the balloon, and holding on to the collapsed silk of the air-ship in that portion of its bulk! In this perfectly helpless condition, the ill-fated man sped straight into the sky in the full sight of his companions, more helpless than himself. So far as is known, there was no possible means for him to secure his descent, whether safe or otherwise. The part of the balloon filled with gas was full twelve feet above him, so that there was no chance for him to cut its sides and allow the gas to escape. He could only cling to his precarious hold and go whithersoever the currents of air should take him.

Without regulation or control of any kind the balloon continued to mount upward, sailing off in the direction of this city and Lake Erie. The fatal ascension took place about 11 o'clock, and at a few minutes past noon it was seen in the town of Bliss field, Lenawee Co., apparently full three miles high, and about the size of a star in appearance. It was still going up and on! At 1¼ o'clock it was dimly visible, going in the direction of Malden, as ascertained by compass bearings taken by parties observing it. What is his exact fate baffles conjecture; but that it is horrible, almost beyond precedent, there can be no doubt. There is not one chance in a million for a successful escape.

Mr. **Thurston** was an experienced balloonist, having built several, and this being his thirty-seventh ascension. He was formerly a resident in the vicinity of Lima and Rochester, in Western New-York, but has lately resided in Adrian, where he was extensively engaged in business as a nurseryman. He was a widower, having lost his wife last Winter. He leaves an interesting daughter about 17 years of age.

THE MISSING ÆRONAUT, THURSTON, HEAD FROM.

The Detroit *Tribune* says:

"We have made careful and extended inquiries upon the other side, sufficient to justify us in stating that the baloon has come to the earth, and further, that in all probability, *it was empty!* From a gentleman who was at Baptiste Creek on Saturday afternoon between 3 and 4 o'clock, we learn that a large baloon was seen to descend to the ground in the vicinity of a large tract of woods, across a wide marsh, some three miles from the station, early in the afternoon.

The balloon was seen at Chatham about 2 o'clock Saturday afternoon, so it was thought, by the telegraph operator. It was about as large in appearance as a kite, and was thought to be such until the news of this affair reached there.

It is a little singular that Mr. **Bannister**, companion of Mr. **Thurston** at the time of this occurrence, two years ago mode an ascent from the same place, when, throwing out ballast too freely, he almost immediately rose out of sight, and was not heard from for two days. His balloon became unmanageable, and himself nearly perished with cold, having frozen both hands and feet. He twice saw Lake Erie pass beneath him, and finally landed in Pennsylvania, near Beaver, having made, involuntarily, the longest trip ever made in America.

The Comet—What it is, and is to be.

The Washington *Union* has a story about the Comet (now visible, morning and evening) that tells all that need be known:

"Notwithstanding the presence of the moon, which materially diminishes the brilliancy of this celestial visiter, it is quite a conspicuous object, and multitudes of star-gazers are nightly turning their gaze in that direction. It may be readily seen by the naked eye on any clear evening, from about 7¼ to 8 o'clock, although it is, of course, viewed to much better advantage with a telescope, even of a low power, not magnifying more than 10 or 20 times. It is now situated near the hind foot of Ursa Major, and is moving towards Arcturus; or, in other words, it is near the horizon, and ranging with the two stars known as the pointers, the comet being about as far to the left of the pointers as the North Star is to their right. The tail is tolerably well defined, and about 3 degrees in length.

This comet was first discovered on the 2d of June last, by Prof. **Donati**, in Florence, Italy. It was first seen in this country by **Henry M. Parkhurst**, of Perth Amboy, N. J., on the 29th of the same month, no information having then been received here of its discovery in Europe. One or two nights afterwards it was discovered by Miss **Maria Mitchell**, of Nantucket, Mass., who also supposed that it had not previously been seen. Thus there were three independent discoveries of this comet, while it was so faint as only to be visible with a telescope, or about the size of a star of the eleventh magnitude. A very striking characteristic of this comet, when it was first discovered, was its extremely slow motion. The great distance of the comet, and the direction of its motion as seen from the earth, combined to render its apparent geocentric motion very small. In consequence of this slowness of motion, it was very difficult for astronomers to fix upon its orbit with much accuracy, and there has been considerable difference of opinion upon that subject. It has already been visible in this country through a telescope for two months and a half; and, notwithstanding the numerous observations that have been made, it is doubtful whether or not it has passed its perihelion, or the point where it is nearest the sun. According to the elements as calculated by Mr. **George Searle**, assistant at the Dudley Observatory, it passed its perihelion on the 13th inst.; the orbit, as calculated at the National Observatory here, gives a result nearly similar; according to the orbit as calculated at the Cambridge Observatory, it should not reach its perihelion until about the 20th inst.; but Mr. **Parkhurst** assigns it a period about a week later than that. He states that "the comet will be approaching both the earth and the sun until October, (or at least not materially receding from the sun,) and will not probably reach its maximum of *inherent* brightness before the middle of October. It will therefore continue to grow more conspicuous until it begins to be again merged in the twilight. But it will very soon change its course to the South, and move so rapidly that it is not likely that it will be seen so late. My last observations seemed to indicate a decidedly elliptical orbit." He thinks that the orbit cannot be parabolic, as a parabolic orbit would not correspond with the observed positions of the comet in June and July last. An elliptical orbit, the ellipse being of moderate eccentricity, would give a period of revolution around the sun much shorter than a parabola. The elements correspond very nearly with those of the first comet of 1827, and with those of the comet of 1764. This would make the period of revolution about 31 years, and allow of two revolutions between 1764 and 1827, as a difference of half a year in the period of revolution may be readily accounted for by perturbations. If this be the correct period, its next return may be expected about 1889 or 1890.

Medicinal Herbs.

At the meeting of the American Pharmaceutical Association in Washington on Thursday, Mr. J. D. **Browne**, of the Patent Office, was announced, and, in conformity with the request to hear him in reference to what the Agricultural Department of the Patent Office is doing for the introduction and naturalization of medicinal and other herbs and plants, proceeded to address the Association. His remarks showed that the Patent Office is engaged in the effort to Americanize numerous foreign highly valuable vegetables, herbs and plants. Among these the principal are the olive, the fig, prune, and cork tree. Such success has been attained in the case of the last mentioned near Cincinnati, and in other places South and West, that no less than 10,000 cans of the acorns of the cork-tree have been ordered for importation. Besides these he mentioned the verbenæ, fenugreek, cyperus esculentus, the chufa or earth almond, the tea plant, and the pyrethrum Caucassicum, which is a plant cultivated for the destruction of insects, and to such an extent that there are already twenty villages in Russia engaged in supplying the preparation. He also mentioned the opium poppy as under cultivation in this country, and the liquorice, with which much success had been attained. Another plant is receiving attention, namely, the ptelia trifoliata, which supplies lupulin, or the bitter principle used in brewing malt liquors, much more plentifully than the hop.

NEW-YORK LIVE STOCK MARKET.

Prepared every week, expressly for the New-York Daily, Semi-Weekly, *and* Weekly Times, *by a careful and experienced Reporter.*

Wednesday Evening, Sept. 22, 1858.

The principal Market Places are **WASHINGTON DROVE-YARDS, 44TH-STREET**; **Browning's**, on Sixth-street; **Chamberlin's**, on Robinson-street; and **O'Brien's**, on Sixth-street. Our reports refer to these regular markets. Irregular sales are sometimes made at Bergen Hill, N. J., and from the Hudson River Boats.

The great sales day at the Washington Yards is on **WEDNESDAY** of each week. The reports from all the yards are made up for the preceding week to the evening of that day.

By New-Jersey Central Railroad	—
By Albany propellers	—
By Hudson River Railroad	901
Camden and Amboy Railroad	964
Total	7,385

Beeves are sold by the estimated dead weight of the four quarters; the so-called "fifth quarter" (hide and tallow) is not reckoned in here as it is in Boston and some other cities. When cattle are weighed or estimated alive, the dead weight is reckoned at a certain number of pounds to the 100 ℔s. of live weight, as agreed upon. The general rule in this market for medium cattle is 56 ℔s. to the 100; 44 ℔s. being allowed for the "fifth quarter" and offal.

The *average* prices to-day, as compared with last week, are near ½c. lower.

We quote:

At **Browning's**, **Chamberlin's** and **O'Brien's** prices do not materially differ from those at Forty-fourth-street. **Browning** reports Beeves at 7c.@8c. **Chamberlin** reports Beeves at 5c.@8c. **O'Brien** reports Beeves at 5c.@8c.

REMARKS ON THE BEEF MARKET.

The surplus receipts of cattle still continue very large, say nearly 50 ℘ cent. above the average yearly requirements for City consumption. Thus, against the average weekly receipts of 3,143 for last year, we have this week 5,505, last week 4,503, the previous week 5,728, and during the week before 5,040. This gives an average of 5,206 ℘ week during a month past. Of course, under this continued overstock prices continue to go down; indeed they have now reached a non-paying figure for producers....Many of the cattle yarded at **Allerton's** to-day were of poor quality—some of them *very* poor. This is partially owing to the lack of nourishment in the prairie grass at the West, after so much wet weather in the Spring, and in part to the fact that quite a number of the cattle now coming in are the remnants of droves, or such animals as farmers choose to turn out in payment for debts previously contracted. Some of them, at the low prices—4c.@6c. ℘ ℔., net—obtained to-day, paid but little more than expenses here, commissions, &c. But that little will probably be set down by the owners as clear gain in the absence of a "stock" company to insure them safely through the coming Winter. A few droves were in direct contrast to these, such as the Florence cattle, which would make a very respectable exhibition as fat Cattle at the County shows. They were duly appreciated by purchasers of good beef, and were better worth 9c. ℘ ℔. than the others were half that sum....The 4,212 Cattle yarded at **Allerton's** yesterday proved no easy task for the brokers after such a succession of full markets. Butchers took hold well, and bought freely—at low prices of course—and were, in many cases, induced to lay in for two weeks to come, under the tempting offer to take a second lot at ½c. less ℘ ℔., nearly or quite equal in quality to their first purchase. With all this, however, the yards were far from being cleaned out at night after a slow, dragging afternoon, during which low rates alone prevailed. The weather was clear and cool, abundantly favoring the markets....Transactions at Albany were large, some 1,300 head selling to Eastern men at 3½c.@4½c., gross, and 300 were taken by the neighboring distilleries for further feeding. About 800 head of those going to Brighton were prime animals, for which 4½c. was paid. We saw men here to-day who sold out at Albany, at low prices as they thought, but who concluded at the close of sales here that they saved $800 on one drove of cattle by selling as they did, so unsatisfactory were the returns of the present market....We give in the following table, the description, owners, sellers, &c., of the principal lots offered at Forty-fourth-street, and in the succeeding special notes some items respecting quality of individual lots, sales, &c., which will aid the distant reader in forming a fair opinion of the general character of to-day's transactions. These tables, &c., are condensed from copious notes made during a personal examination of the yards, continued through the entire day:

No.	State.	Owners.	Salesmen.

C. G. **Teed** sold for J. **Bryant** 75 good Ohio Cattle, at $65@$70 ℘ head; estimated weight of 850 ℔s. net.

J. A. **Merritt** sold for **Alexander Crum** 85 common thin Illinois Cattle, at 7c.@7½c., on 6 cwt., net.

S. B. **Richardson** brought in 98 fine Ohio Cattle, fed by **Kirkpatrick**, of Fayette County, and ranks as second best in the yards to-day. Estimated weight 850 ℔s., net. **Benedict & Vail** were selling them at 8c.@8½c. I. **Anderson** took twelve of them at 8½c. to be weighed. Ten others were taken at $78, and ten at $80 ℘ head.

MILCH COWS WITH CALVES.

Milch Cows are sold at each of the above yards, *usually with their Calves at their sides*. The prices change somewhat with the supply and demand, and vary greatly, of course, upon the milking value. The particular fancy of the buyer has also considerable to do with the price. Not unfrequently a Cow is sold at $90@$100, or even $120. The general price throughout the year for ordinary Cows is $31@$40, or $50. Quite a number sell above $50, and more, perhaps, below $30. We often see apologies for Cows go at $20@$25. The weekly reports from the different yards will give the weekly fluctuations.

The Cow markets are just fairly supplied at present, and more activity is apparent. The demand is mainly confined to milkmen.

Allerton reports receipts of 22 fresh Cows, selling at low prices, say $25@$30 for ordinary, and $35@$40 for good animals. The market is gradually improving.

Browning reports receipts of 41 Milch Cows, selling at $25@$30 for ordinary, and $35@$45 for good animals. No change in the market.

Chamberlain reports receipts of 89 Milch Cows, selling at $20@$30 for common; $40@$50 for good, and $55@$60 for extras.

O'Brien reports receipts of 62 Milch Cows, selling at $30@$35 for common; $40@$45 for good; with a few extra animals at $50@$70. Market improving, with a moderate supply offering.

VEAL CALVES.

Veal Calves are sold by live weight, each animal being weighed alive at the time of sale. "Bobs"—that is, Calves a few days old—are usually sold by the head at such prices as can be agreed upon, sometimes for but little more than the skin is worth. The principal places of sale are **Allerton's**, **Browning's**, **Chamberlin's** and **O'Brien's**.

The demand for Veal is fully equal to the present supply, and prices are a trifle higher.

Allerton reports receipts of 347 Veal Calves, selling at 5c.@6½c. Supply rather short, although the demand is not active. A very few of the finest Calves brought 7c. gross.

Browning reports receipts of 43 Veal Calves, selling generally at 5c.@6½c. ℘ ℔. Market tolerably brisk.

Chamberlin reports receipts of 59 Veal Calves, selling at 5c.@6½c. ℘ ℔., gross.

O'Brien reports receipts of 82 Veal Calves, selling at 5½c.@6c., and for a few of the best 7c. Sales brisk at higher rates.

SHEEP AND LAMBS.

These are chiefly sold at **Allerton's**, **Browning's** and **Chamberlin's**, at so much ℘ head for a particular lot of Sheep or Lambs, or of the two together. They are also frequently sold by live weight, as this is readily ascertained. The actual prices at the different yards seldom vary greatly. The difference in reported prices is generally due to variation in the quality. When they are sold by weight, it is usually the *net* weight, which is ordinarily one-half what they weigh when alive, the pelt and offal making the other half. If fat and small-boned, they will dress 55 ℔s., and in some cases 60 ℔s., ℘ hundred. The average run is about one-half the live weight.

The Sheep market has been quite active during the past week, and prices rule a trifle higher. Good stock commands a ready sale.

Allerton reports receipts of 1,584 Sheep and Lambs. Sheep are selling at 3½c.@4c., and for a few of the best 4½c., ℘ ℔., gross. Lambs are worth 4½c.@5½c., gross, or $2@$4 50 ℘ head. Supply quite equal to the demand, which is tolerably active at former prices.

Browning reports receipts of 4,230 Sheep and Lambs, selling generally at 3½c.@4½c. for Sheep, and 5c.@5½c. gross, for Lambs. Supply rather short for to-day, having sold out nearly each day as they arrived. Prices are firmer, and on good stock 25c. ℘ head higher than last week. The market, upon the whole, is very good.

Chamberlin reports receipts of 4,876 Sheep and Lambs, selling at $2 50@$5@$6 ℘ head.

O'Brien reports receipts of 2,117 Sheep and Lambs. Sales by **McGraw & O'Brien** were as follows:

38 Sheep	$95 00	65 Sheep	208 75
61 Sheep	167 12	22 Sheep	77 50
119 Sheep	315 63	232 Sheep	701 49

Total	1,859		$5,972 56

Average ℘ head, $3 21.

SWINE.

These are sold alive at so much ℘ ℔. gross or live weight. They are principally sold at **Allerton's**, Forty-fourth-street; at the Western Yards, Fortieth-street; and at the Hudson River Drove Yards, Thirty-seventh-street; while large droves are frequently sold direct from the cars or boats, and driven immediately to the various slaughter-houses,

Receipts for the past week have been more free, footing up some 10,300. Notwithstanding prices have advanced since last week, yet the large arrivals for the past few days give indications of favoring the buyer. The present cool weather facilitates operations.

Arrivals for the last two days have been heavy, and prices are favoring the buyers. If they continue this a few days a decline must follow.

A. R. **Turner**, Manager of the Hudson River Drove Yard, reports receipts of 7,385 Hogs—of which 899 were sent to Western Yards; 4,902 were sold, and 1,584 remain in the yards.

Wholesale Produce Markets.

Reported exclusively for the New-York Times.

Wednesday Evening, Sept. 22, 1858.

The prices given in our report from week to week are the average wholesale prices obtained by producers, and not those at which produce is retailed from the market. The variations in prices refer chiefly to the qualities of the articles.

The Produce markets have been rather inactive during the past week.

Potatoes are a little brisker at former rates. They are mostly in good order. The rot is affecting them only in limited localities. Prices remain as last week. Sweet varieties are a little firmer just now, owing to the detention of cargoes now due.

With the ordinary truck of the season the markets are abundantly supplied, and much of it, more especially cabbage, is quite dull.

Apples and Pears are in fair supply. Fall Pippins begin to come in and command $3@$3 50 ℘ bbl., while a few bbls. of Virgalieu Pears brought $10 ℘ bbl.

Plums are nearly gone, and their place supplied by Grapes which are quite plenty, especially the common Fox Grape.

Butter is in moderate demand, except choice packages for table use, which sell readily at 25c. ℘ ℔.

Eggs are scarce and rather higher. Limed ones will soon be coming in, when lower prices are anticipated.

Poultry is in good demand, and a brisk trade is now kept up.

DANCING.

A. DODWORTH'S
DANCING ACADEMIES,
No. 806 Broadway, New-York,
No. 137 Montague-place, Brooklyn,
Will commence in New-York on SATURDAY, Sept. 25; in Brooklyn, FRIDAY, Sept. 24.
Mr. DODWORTH would take occasion to say that he has long felt the necessity of introducing a system of instruction for the use of the younger pupils, by which the exercise of dancing would be of more benefit physically, and more useful in the development of graceful movement, than it has been of late years. The facility with which the Polka and similar dances of the present time are acquired, has induced many to neglect those exercises that were formerly indispensable. To that neglect, as one of the causes, may be attributed the appearance of so many round-shouldered young misses of the present generation. They are sent to school, and allowed to stoop over their desks without intermediate exercise, until the growing frame assumes the position in which it has been so long restrained; they are then sent to a teacher of dancing, with the expectation that by learning the Polka, Scottische and a few other dances, all this will be remedied, and that they will at once become graceful women. Surely these things should be better understood. Were children sent to dancing early in life, at intervals during their necessary studies, and the teacher allowed to exercise them in such a manner, and in such dances (in addition to the fashionable ones) as would add grace to the figure, walk, and every movement, something would then be gained consistent with the true object of this valuable accomplishment. Anxious to restore the art to its former usefulness, Mr. Dodworth instructed his classes in the last season, by a graceful study, the "Minuet de la Cœur," and other dances of similar usefulness. The evident success of this course in its effect upon the pupils encouraged him to give more attention to Dancing as connected with Calisthenics; and, during his late tour through Germany, France and Great Britain, he made it his business to call upon the most prominent teachers, and consult with them in regard to the best method of accomplishing those desirable results. He hopes, therefore, to have gained such information as will, in addition to his own experience, enable him to present to his pupils a system that will not only make them dance the Polka, but will improve their health, figure and walk, and consequently have a salutary effect upon every movement in life.
During his European tour of this season, Mr. Dodworth has had favorable opportunities of studying the peculiar dances of Poland and Hungary so popular at the present time in Vienna. Some of these, with other novelties, will be introduced at the earliest moment of the present season.
Circulars may be had at either Academy.

FERRERO'S DANCING ACADEMIES,
No. 59 West 14th-st., New-York:
No. 122 Clinton-st., Brooklyn.
Mme. DUBREUIL FERRERO and E. FERRERO respectfully announce that the above Academies will open on Oct. 9, in New-York, and Oct. 12, in Brooklyn. Gentlemen's evening class on Oct. 18 in New-York, and Oct. 19 in Brooklyn. All dances now in vogue on the Continent will be taught during the season. Strict attention paid to walking, standing, manners, and first rudiments of dancing. Schools and private classes attended. Soirees given as usual. Circulars can be had at the Academies.

THE ART OF DANCING.—NO. 54 EAST THIRTEENTH-ST., NEAR BROADWAY.—Mr. CHARRAUD, assisted by Mrs. A. LANNAY, respectfully acquaints his patrons and the public that his Classes will open on Saturday, Oct. 23. Days, Wednesday and Saturday, at 12 o'clock noon, for children; at 3½, afternoon, for young ladies and masters. Gentlemen's Class on Tuesday and Friday at 8 o'clock, evening—to commence Nov. 1. Soirees as usual. Circulars obtained at the room, or at Mr. CHARRAUD'S residence, No. 148 East 17th-st., near Stuyvesant-Park.

HOTELS.

ST. DENIS HOTEL,
ELEVENTH-STREET, CORNER OF BROADWAY.
The subscriber, for many years connected with the Julien Hotel, and lately proprietor thereof, takes this method of informing his friends and the traveling public, that he has, on the 10th of April, A. C., purchased the interest of Mr. D. Julien in the above establishment.
It has, since the consummation of that purchase, been the aim of the subscriber to put his House in complete order, and the same is now thoroughly repaired, repainted, and has been, wherever necessary, refurnished. Water-cisterns, heaters, a separate entrance for ladies, and, in short, whatever was required to bring the Hotel upon an equal footing with the best establishments, has been supplied. The kitchen and lower departments of the house have also received the most untiring attention, and the proprietor feels convinced that he is enabled to provide for his guests in even a better manner than he was at his former hotel, and cheerfully gives the assurance, that at all times his whole attention will be devoted to their comforts, and no pains or expense spared to render his House a quiet residence for families as well as single gentlemen. PETER DEGIVE.

MANSION HOUSE—HICKS-STREET, BROOKLYN Heights, midway between Wall-st. and Fulton Ferries; has superior accommodations for families or single gentlemen, which will be let on reasonable terms. The location for a Summer or Winter residence is most desirable, having a large yard for play grounds in the rear.

NEWS OF THE DAY.

The steamship *Niagara*, of the Cunard line, from Liverpool on the 11th inst. for Boston, called at Halifax early yesterday morning. Her news is not important. Nothing further in regard to the Atlantic Cable has transpired, though from the fact that the shipment of the heavy shore ends from Plymouth has been countermanded, it is to be presumed the directors regard the accident as serious. They were to meet at Valentia on the day the *Niagara* sailed. The China and India mail with the Anglo-French treaties had arrived. The reported purchase by Russia of the port of Villa Franca, in the Mediterranean, is confirmed.

Our correspondent at Tien-tsin supplies an eminently graphic and interesting account of the negotiation and execution of the American Treaty with China.

Interesting advices from our Squadron on the coast of Africa will be found embraced in our Special Dispatch from Washington this morning. The news is to the 17th of August.

A dispatch from Halifax states that the ship *Rosenheath* had arrived there, which reports that, on the 15th inst., in lat. 45° 12', lon. 41° 48', she passed a large "red-bottomed steamer," on fire, which appeared to be of American build, with a very short bowsprit. The *Rosenheath* subsequently spoke the bark *Arabian*, which had passed close alongside the burning steamer, and ascertained that there was no person on board. A strong gale was blowing at the time, and the name of the steamer could not be ascertained. The fate of the crew is of course unknown.

Our files and correspondence from Buenos Ayres, to the 28th July, came to hand yesterday. It will be seen that a collision between that Government and Paraguay is not improbable; and that, instead of entering upon open hostilities against Buenos Ayres, General Urquiza has resorted to a war of tariffs, which is likely to prove equally effective. Fresh Indian outrages had occurred on the frontier, the savages escaping as usual without punishment.

Kansas papers publish long accounts of the gold discoveries in that Territory. The Leavenworth *Evening Journal* expresses the opinion that "there are in Kansas placers of gold equally as rich as those of California.

Later news has been received from Utah by the arrival of the Salt Lake mail at Leavenworth, Kansas. Everything was peaceable. Brigham Young still kept himself housed, though the danger of violence towards him had passed away. The troops are reported well. Gen. Johnston intends wintering at Camp Floyd, and huts for that purpose were being constructed.

The Board of Inquiry, in session at Fort Leavenworth, to investigate the mule contract for the Army of Utah, have made two reports; one by the majority, condemning the conduct of Van Vliet, and declaring that many animals for the use of the troops were improperly rejected, and raising the appraisement, and one by the minority (Major Sherman,) declaring that the conduct of Van Vliet was justifiable. The majority report, if approved, will add some fifty thousand dollars to the contractor's profits, the appraisement being increased to $185 per head.

Capt. Lovejoy, of the brig *Jachim*, 13 days from Inagua, which arrived yesterday, reports having experienced a hurricane in lat. 34° 46', long. 73° 27', in which he lost his sails and had his decks swept. On the 17th, in lat. 36°, long. 72° 35', he observed a comet at 12 h. 9 m. 21 sec., Greenwich time, its altitude being 5° 29' 10".

The Grand Lodge of Odd Fellows, in session at Washington, has received reports of the state of the Order in the United States for the past year. The only States which report a positive prosperity are New-Jersey, Ohio, Indiana, Illinois, Missouri and Louisiana, and Canada West. In Canada East the Order has died out; in New-York it makes no progress; while in Virginia and Kentucky there is a perceptible falling off.

The State Temperance Convention assembled at Utica yesterday, but owing to the informality of the call, and for other reasons, it was resolved that it was inexpedient to organize, and the Convention was adjourned *sine die*.

The four steamers of the Cromwell Southern line of steamers, which have been chartered by Government to accompany the Naval expedition to Paraguay, are the *Memphis*, *Atlanta*, *Caledonia* and *Westernport*. They are all to be at the Navy-yard to-day to receive their equipment.

At the meeting of the Commissioners of Emigration yesterday, a resolution was agreed to adopting the contract system, instead of day-labor. The President, on behalf of the Board, denied that the Commissioners of Emigration had used their influence with the authorities of New-Jersey to prevent the removal of Quarantine to Sandy Hook.

Fifteen of the Harbor Police, under command of Capt. Silvey, continue to watch at Castle Garden to protect it from the torch of the incendiary. Anonymous threats having been made to destroy the place.

The Commissioners of Health transacted little business of public interest yesterday. A petition, with several hundred respectable names at the bottom of it, requesting Mayor Tiemann, as the head of the Health authorities, to take the necessary steps for immediately rebuilding the Hospitals at Staten Island, was received and placed on file.

The police have been wholly withdrawn from the Quarantine inclosure at Staten Island, and the protection of the buildings is now intrusted to the Eighth Regiment, which will be relieved by another regiment on Monday next. The service now required of the soldiers at Staten Island is losing its romantic features, particularly the duties of the night patrol, the last few nights being uncomfortably cool. The regiment have elected C. G. Waterbury Lieutenant-Colonel, and O. F. Wentworth Major.

The Young Men's National American Union Club met last night in Stuyvesant Institute to ratify the nominations of the American Convention at Syracuse. The audience was not large, and the speakers were few. The principal addresses were those of the Hon. E. O. Perrin, of Tennessee, and Mr. Geo. W. Morton, City Inspector, and the Hon. Chas. T. Mills. The speeches and resolutions were strongly adverse to the Central Railroad interest, and warmly in favor of a continued recognition of American principles, irrespective of all consequences.

A dispute occurred yesterday morning between George Simon and Mrs. Mary Hays, both Germans, residing in a tenement house rear of No. 199 Second-street, in the course of which Simon stabbed the woman in the chest, the knife penetrating the left lobe of the lungs, and inflicted three savage cuts on the head and one across the neck. Mr. John Hermour and his wife ran to the rescue of the unfortunate woman, when Simon turned upon them, inflicting upon Mr. Hermour two scalp wounds and stabbing his wife in the shoulder. Simon immediately ran away and the Police thus far have been unable to find him. It is not believed that Mrs. Hays will recover. The injuries to Mr. and Mrs. Hermour are not deemed dangerous.

In the Court of General Sessions yesterday, Frederic Ramsay, charged with highway robbery, pleaded guilty to assault and battery, with intent to rob. He was sentenced to four years in the State Prison. William Somers was placed on trial for murder. On May 19 the ship *Mandarin* lay in the East River, foot of Wall-street. Somers was a sailor on board that vessel, and John B. Aikens was second mate. Somers had been shipped a few days previous for the next voyage. On the night in question he was very drunk and quarreled with Aikens in the forecastle. Early on the morning of the 20th all hands were called to wash decks, when Somers was not forthcoming, but lay in his bunk, recovering from his previous night's debauch. Aikens ordered him to get up, and on his refusal, proceeded to pull him out, whereupon Somers stabbed Aikens six times with a large dirk knife. Aikens ran upon deck and in a few minutes expired. Somers did not deny the deed, but said it was done in self-defence and because Aikens deserved it. His defence yesterday, as urged by his counsel, was, mainly, that be saw a knife in the hands of Aikens, when the latter attempted to pull him out of his bunk, and fearing he was going to be stabbed, he wrested away the weapon and assaulted his presumed antagonist, without intention of killing him. The principal witnesses were Dr. Finnell, who testified that death was caused by hemorrhage from the aforesaid wounds, Albert Wall, James Plaice and Edward Mervin, seamen belonging to the *Mandarin*, and Albert C. Malcom, a Sandy Hook pilot. There were no witnesses for the defence. The trial will be continued to-day.

The examination of James Stephens, charged with having poisoned his wife, which was to have taken place at 2 P. M., yesterday, before Justice Welsh, has been postponed till the body of the wife can be exhumed and an analysis made of the contents of the stomach. The deceased was buried in Greenwood Cemetery, nearly a year ago. The prisoner meantime remains in custody, bail for him having been refused.

Six persons have been arrested in this City suspected of being implicated in the murder of Mrs. Ann McMahon, at Newark, N. J., on the 19th inst. Among the prisoners are the husband of the murdered woman, his two brothers and mother. They were given in charge to Mr. Whiting, Chief of Police of Newark, who took them to Newark for trial.

The General Markets, yesterday, were quite active for Flour, which closed rather dearer. Wheat and Corn were also in request at buoyant prices. Pork was freely purchased at, however, lower rates. The movements in Groceries, Cotton and Hides were restricted. Spirits Turpentine and common Resin were more sought after and were firmer. Freights were quiet, with 814 vessels of all classes in port.

The Cattle Markets still continue largely overstocked. The receipts for the past week amount to 5,305, against an average of 3,143 for the weekly receipts for all last year. The total receipts for only four weeks past amount to 20,626, or an average of 5,156 per week. Prices were down again yesterday about ½c., and beef is now wholesaling considerably lower than at any time before in many years. Consumers *should* now make their purchases at reduced prices.

The Chinese Treaties.

The summaries hitherto given of the several treaties just made by the Christian powers with the Emperor of China, have not been full or correct. The secrecy of Russian diplomacy, and the small progress made by the French and British plenipotentiaries, have been sufficient to account for our inaccurate knowledge of their transactions; and as the "most favored nation" clause was the all-essential article of the American Treaty, it was impossible to say what Mr. Reed had actually gained, until we learned what favors had actually been granted to other nations. While the more explicit information we are now furnished with is of an unofficial character, we have strong reason to regard it as authentic, and may retrace our previous outline with more definite certainty. To take the treaties in the order of negotiation, we must begin with the Russian Convention of May 28, repeated and confirmed by a subsequent instrument, signed on June 13. Its main points are, the residence of a Russian Ambassador at the capital; the continuance of the present college of Russians in that city, and the cession of the upper region of Manchooria. This cession has been stated as reaching to the left or northern bank of the Amoor. It appears, however, to approach still nearer to the Chinese wall. A usually well-informed correspondent of the London *Times* tells us, "That part of the right bank is to remain in the possession of Russia which is between the confluence of the Shilka and the Argun, and the spot at which a river called Usuri falls into the latter. The Chinese are to enjoy the privilege of navigating the lower Amoor, and the Russians will be at liberty to trade on the Songari." It will be seen that in direct gain, the Russians have the better of their competitors.

The American Treaty is the next in order, having been celebrated on the 18th of June. This obtained direct correspondence with the Imperial Prime Minister; a right of visit and temporary sojourn of an American envoy at Pekin; the addition of Swatow and Taiwaa to the existing category of open ports; the exclusive jurisdiction of the United States authorities over its own citizens; the toleration of Christianity, and the protection of Chinese converts. The principal trait, however, was the closing article, which embodied comprehensive provision that all rights, privileges and powers granted to any nation, its merchants or subjects, whether political, mercantile or otherwise, and not conferred by this treaty on the United States, shall at once inure to the benefit of the United States, its peculiar functionaries, merchants or citizens.

The French and British Treaties which were drafted, and on the eve of execution, at the latest advices, are reported as embodying the following leading points:

> "Expenses of war to be paid to the English and French—about $16,000,000 to the English, and $6,000,000 to the French.
>
> Money to be paid out of Canton duties, which are to be received by foreigners till the amount is liquidated, and Canton still held as a material guarantee.
>
> Each Power to have an ambassador at Pekin, but he is not to reside within the walls.
>
> Each to have a consular agent at Tien-tsin.
>
> The navigation of the Yang-tse-Kiang to be thrown open.
>
> A Chinese mission to England and to France, but no representative to be considered as a permanent resident.
>
> The addition of Hang Chaw, Swatow and Taiswan to the list of open ports."

Upon this review of the several papers, we are enabled to found our estimate of the advantages really secured to our own people. In common with the three European Powers, we shall be entitled to have a resident Minister at, though not within the walls of, Pekin; a Consular Agent at Tien-tsin; access for all our citizens to every part of China; a College of Americans at Pekin, similar to that now possessed by Russia; free navigation and right of traffic through the entire length of that mighty river, the Yang-tze. According to another and apparently equally authentic statement of the contents of the English and French treaties, every port of the Empire is to be thrown open to the barbarians. On this signal concession the London *Times* endeavors to throw doubt. As, however, the Imperial Commissioners actually exhibited to Lord Elgin their authority to concede all his demands, before they had heard what his demands were to be, it is hardly probable he would have omitted the occasion to break down the vexatious exclusiveness of the country. Indeed, when we permit ourselves to believe that foreigners are to have the freedom of the Empire for travel and traffic, we see no reason for hesitating at the statement touching the opening of the ports. These, then, are the new conditions of intercourse which the treaties of Haikwang have secured for the great commercial powers of the world. It is needless to say they involve an entire abandonment of that seclusive policy which has ruled in China from periods beyond the reach of history. They readmit the arts and results of civilization to the land of their ultimate nativity. They give a fair field to the experiments of effective missionary labor; for by these treaties, one-third of the population of the globe speaking a single language is opened to evangelical enterprise. What with the more favorable duties of tonnage and export, the less restricted theatre of commercial dealing, the privilege of access to the heart of the vast empire along the waters of that flowing inland sea, the Yang-tze, it is hard to affix a limit to the development of trade. Nor is the event less significant in its scientific and philosophical aspects. From that wide stretch of the earth's surface, the geographer, the ethnologist, the physical inquirer, have hitherto been shut out. Chinese history, as written, and as illustrated by the customs and manners of the people, has been hitherto an inscrutable enigma to the student. It is now accessible. The anomalous religious system, the admirable but apparently exotic moral code of Confucius are now within the scope of thorough examination and estimation. Indeed, the products of these treaties will come home to every human interest; will throw light on every field of curious inquiry; and so, in return for the civilization we propose to carry thither, we shall bring back a hundred fold in additions to our materials of human development. The only contingency which can defeat these splendid anticipations is the likelihood of the compacts being disregarded as soon as the immediate presence and pressure of the Allies are removed. But the postponement from such cause will be transient. It will only show the necessity of maintaining a large military and naval force within striking distance of the capital; a measure that will, of course, be promptly adopted whenever shown to be necessary.

Niagara Falls Hydraulic Company.

The affidavit sworn to on Saturday, before Justice Welsh, of this City, by Edward S. Latham, of Seneca Falls, in respect to the organization of the above-named Company, if true, discloses a remarkable case of fraud and perjury. It will be recollected that he charges Caleb S. Woodhull, Walter Bryant, Stephen M. Allen and Daniel D. Badger with falsely swearing that the entire capital of said Company—$500,000—had been paid in, in cash, when, in fact, neither that amount nor any part thereof was paid at all, but only a trick was resorted to, by carrying a box containing $100,000 five several times into the office of the Company, and finally taking it away altogether. The four gentlemen above named, it is alleged, made oath to a certificate of payment, filing the same in the Clerk's Office of Niagara County, and a copy in the office of the Secretary of State, as required by statute. These transactions took place, as is said, in the Spring of 1853, and Mr. Allen has been arrested on Mr. Latham's affidavit—the charge as against the other three parties being outlawed. Besides the four persons who swore to the payment, as stated by Mr. Latham, the Company consisted of Alfred Ashland, Wm. Cockcroft, Abram Wakeman, Charles Reed and John Reed. Mr. Abram Wakeman, one of the Directors of the Company, who is a lawyer of this City, publishes a card in this morning's Times, explanatory of his connection therewith. It throws a little light on the transaction, inasmuch as it implies that Mr. W. did not first learn the alleged mode of paying the capital from Mr. Latham's affidavit. It appears that in his professional capacity Mr. W. drew up the papers, preparatory to incorporation, and made certain searches. All this, he says, was done "legally." In remuneration of his services he received fifty shares of the stock, ($5,000,) and asserts that he had "no suspicion but that everything had been done correctly," the payment being made without his "knowledge or advice."

Of course it remains to be seen whether Mr. Latham will sustain his accusation; and the public have yet to learn why he did not make it at an earlier day. Five years and a half have elapsed since the Company was formed, and the statute of limitations shields all the parties but one, who has happened to be absent from the State for a portion of that time.

New-York Politics.—Not long since, President Buchanan confessed to a deputation of the Democracy of this City—who waited upon him to solicit his interference—that he was wholly unable to understand New-York politics, and was sorely puzzled what to do in relation to the opposing factions which constitute the Democratic Party of this State. The difficulty of the President is not to be wondered at, for the political parties of New-York were never in a greater snarl than they are now. The Boston *Atlas*, however, professes to understand the embarrassing subject perfectly. That paper says:

> "Our acquaintance with New-Yorkers and New-York politics has been pretty extensive, and we think we understand them pretty well."

If this be the case, the editor of the *Atlas* ought to come on here and deliver a lecture upon the subject. There are a good many of our politicians who would be most thankful to any one who could tell them where they belong and where they ought to go.

Congressional Independence.—Curious notions of personal independence prevail at Washington, if the *Star* is to be taken as authority. That paper of Monday, in the course of an article eulogistic of Mr. Letcher, of Virginia, says:

> "As John Letcher goes, so invariably go twenty or thirty gentlemen of different parties, who are sufficiently independent to do what they believe to be right."

To go invariably as John Letcher goes is "independence!" Certainly a luminous and philosophical definition.

Vanitas Vanitatum.—The Boston papers are chronicling the death of an old man in that city, named Francis, who, after a long life of penuriousness and note-shaving, left a fortune of four millions of dollars. The sum is not altogether contemptible, but in these days of millionaires it is not startling, and as the result of nearly eighty-three years devoted to money-getting, the game seems hardly worth the candle. This poor old man, before he died, was considered the richest individual in Massachusetts.

A Sudden Change.—After two or three days of sweltering hot weather, which seemed more like July than September, the wind suddenly changed to the northwest yesterday, and the air felt full of frost. The sudden change must have done extensive harm to the yet ripening corn that needed a week more of warm weather.

POLITICAL.

The Republican Primaries.

The Republicans of the City met last evening, between the hours of 6½ and 8 o'clock, in their respective Wards, to elect delegates to the County and Congressional and Assembly Nominating Conventions. Much interest was manifested in the result, and in many of the Wards, two tickets were voted.

In the First Ward there was considerable excitement. There was a "Regular" and an "Opposition" ticket balloted for in different places, each claiming to be genuine. Their dispute must be referred to the General Conventions.

The proceedings in the Second Ward were quietly conducted—and the vote was unusually large. The Fusion ticket met with but slight opposition.

The Third Ward elected delegates favorable to the nomination of James H. Welsh for Sheriff, and George E. Sherwood for County Clerk.

The voting in the Fourth Ward was conducted quietly. The delegates chosen were reported to be in favor of Welsh for Sheriff, and James Kelly for County Clerk.

Two tickets were run in the Fifth Ward—one in favor of Sherwood and the other for John A. Kennedy for County Clerk. The Kennedy party claimed the victory.

The O'Brennan faction were said to be successful in one part of the Fifth Ward, while the Van Wyck party succeeded at another place.

In most of the upper Wards, more than one ticket was run, and in some of them there were personal collisions—though not any of a serious nature.

Appearances now indicate the nomination of James H. Welsh for Sheriff and George E. Sherwood for County Clerk, while Amor J. Williamson will probably receive the union nomination for Congressman for the Third District. The negotiations, however, are many and complex. Should Welsh receive a union nomination for Sheriff, an American (either Ex-Police Justice Davidson or Robert Beatty) must receive the nomination for County Clerk. Captain Toone, however, has a strong party in his favor for Sheriff, and should he succeed in obtaining a union opposition nomination, the County Clerkship will doubtless be given either to Ex-Alderman Kelly, of the Fourth Ward, or Mr. Sherwood, of the Fifth. The principal fight is upon the County Candidates.

Indorsement of the American State Ticket.

MEETING OF THE YOUNG MEN'S NATIONAL AMERICAN UNION CLUB.

Last evening, in the Lecture Room of Stuyvesant Institute, No. 659 Broadway, the Young Men's National American Union Club met and ratified the American State Ticket adopted at Syracuse. "The attendance of the American masses" was not so large as was anticipated. The room was barely more than half full, though in the matter of time, the utmost indulgence was extended to both speakers and hearers. At 8 o'clock, Mr. Chas. T. Mills, accompanied by the Hon. E. O. Perrin and others, took his place on the platform. Mr. Mills called the assembly to order, expressed his regret at the paucity of the attendance, and hoped that the meeting would not be regarded as foreshadowing the strength of the American Party when it came to vote. [Applause.]

Mr. Phillips, the Secretary, read the call and proposed a list of subordinate officers, which was adopted *nem. con.* He then submitted the following resolutions which were accepted and approved unanimously:

Resolved, That this Club hail with unbounded satisfaction the American State ticket, headed by Lorenzo Burrows for Governor, regarding it as a most excellent and strong one in every respect, and deserving, as it will undoubtedly receive, the hearty support of every American; a ticket which is undisguisedly and warmly favorable to the practical adoption of a policy which shall lead to the enlargement and improvement of those important and valuable commercial arteries of our State—the Canals.

Resolved, That the monster monopoly known as the Central Railroad, of which the Republican candidate for Governor is the acknowledged representative, is entirely composed of, and ruled by, a clique of capitalists in bitter hostility to the prosperity and progress of the canals;—capitalists who are as unprincipled in their designs, as they are wealthy to achieve them.

Resolved, That therefore it is the duty and interest of every citizen, who is opposed to "Monster Monopolies," of every kind and description, and who is in favor of the protection, encouragement and improvement of the canals, the reduction of taxation, opposed to special and corrupt legislation, to vote, without regard to party differences, for the protection of the people, by giving his suffrage to the American State Nominations, which deserve in every respect to be regarded as the "People's Ticket."

Resolved, That we cheerfully pledge ourselves to a united and firm support of the American State nominees, and would call upon the Americans of the Empire City and State to rally as with the mind, impulse, and heart of one man and work for them.

Resolved, That we denounce as dishonorable and pusillanimous, as it was unnecessary and unjustifiable, the treatment the American State Convention recently received from the Republicans at Syracuse.

Mr. Brower, in the absence of the expected speakers, was called on for a song, and treated the audience to a comic effusion, which was encored; he sang another, which elicited much approval.

Hon. E. O. Perrin made a good speech, ridiculing the idea of a fusion with the Republicans in Syracuse, at the expense of a wholesale sacrifice of American principles. He charged the leaders of the Republican Convention with having labored to prevent a coöperation between the parties by insisting that the Republican Party should still adhere to sectional principles. He called on all true Americans to support the ticket headed by Lorenzo Burrows, and predicted that if they did so, though they should thereby secure the election of Mr. Parker as Governer, Kansas would be admitted as a State as soon as her Constitution should be presented, the back of the Republican Party would be broken, and the American Party would have a clear field for 1860. [Loud cheers, and groans for John C. Fremont.]

Mr. Brower sang another song, which was warmly applauded.

Mr. Geo. W. Morton, City Inspector, delivered a brief address, in which he denied that it was proscriptive on the part of Americans to oppose the influence which foreign voters were allowed to wield simply because they were foreigners, and claimed that it was but just on the part of Americans to insist that no man should be entitled to vote in America until he is sufficiently Americanized to know how, for whom, and for what principles he casts his ballot. [Applause.] He acknowledged that in the abstract principles of Democracy all true Americans concurred, and described the Roman Catholic Church with Jesuistical establishments as the insidious enemy of our free institutions. He fully indorsed the doctrine of popular sovereignty, but hoped the party would use every legitimate effort to prevent in the territories the spread of an evil (Slavery) which all Americans condemned. He dwelt on the injurious influence exercised on the political and social interests of the State by the Central Railroad Company, and described this as a question involving no purely political issue, but one addressing itself to the pockets, and, consequently, to the most attentive consideration of the people of the City and of the State.

In speaking of local politics, he advised that the best men be selected for candidates for Municipal offices, and that only men who respond to the sentiments of Americanism be selected by the American Party and sustained by American votes. [Applause.]

Mr. Chas. T. Mills spoke briefly. He denied that the American Party was to be committed by the declarations of fanatics who professed its principles, and asserted that the man who charges it with proposing to deprive the foreigner of any of his rights, civil or religious, lies! [Cheers.] The American Party opposed no man on account of his individual predilections in the matter of religion; it only opposed a religious hierarchy—a huge religious establishment which fostered tyranny and despotism abroad, and aimed at the connection of Church and State here, and the consequent subversion of all our liberties. [Cheers.]

Other addresses were made, and at a somewhat advanced hour the meeting broke up.

Kings County Politics.

Kings County Democratic Nominations.—The County Convention of the Bradley portion of the Democratic Party met in Flatbush yesterday, and made the following nominations:

For Surrogate—P. J. Gallagher.
For Registrar—Wm. G. Lawrence.
For County Clerk—Wm. H. Powell.
For Coroner—John Bellingham.
For Superintendent of the Poor—Albert Fries, of New-Lotts.

The Vanderbilt County Convention met at Holders' Three-Mile House, and made the following nominations:

For Surrogate—B. Frank Brown.
For Registrar—C. R. Del Vecchio.
For County Clerk—R. W. Allen.
For Coroner—Wm. Jenkins.
For Superintendent of the Poor—James Conway, of Flatbush.

Republican Assembly Nominations.—The Republican Assembly Conventions for the Kings County Districts met last night. The Seventh District Convention met in Union Hall, corner of Ewen and Meserole streets. Mr. James Gridley, of the Nineteenth Ward, was chosen President, and Dr. Frank Tuthill, of the Seventh, Secretary. The delegation being complete, it was moved to go into informal ballot for a candidate, but, after long discussion, this was negatived, and a motion carried to adjourn to the evening of the 11th of October, at the same place. Most of the other Conventions adopted the same policy—generally, however, adjourning to meet again on the call of the officers of the meeting.

Congressional Convention.—The Republican Convention, for the First Congressional District, met, Tuesday, and adjourned to October 12 without making a nomination.

American General Committee.—The Kings County American General Committee held a business meeting at the Shakespeare Hotel last evening. Sixty members were present, representing every Ward and town in the County. The result of their deliberations had not transpired last night, but it is known that a majority of the Committee are in favor of some sort of a Union with the Republicans on local officers.

Staten Island Matters.

THE POLICE WITHDRAWN—THE EIGHTH REGIMENT TO BE RELIEVED.

The Staten Islanders took a long breath yesterday. Their characters having improved so rapidly under the watch and guard of the Metropolitan Police, that the presence of this formidable body of men within the Quarantine inclosure was no longer necessary, they were withdrawn. At noon, the only ten men remaining upon the ground pulled up stakes, struck their tents, and embarked on board the steamer *Doctor Kane* for New-York. In walking over the ground yesterday, our reporter was almost overcome with melancholy at the changed and sombre aspect of affairs within the Quarantine walls. Upon the green, where but a few days since were ranged the tents of the Police, filled with clean, inviting straw; where the camp-fires glowed beneath immense kettles of turtle soup, and the long pine table was set out so temptingly with tin pots full of smoking hot coffee, and "huncks" of bread and butter, there was now nought but desolation and emptiness. Piles of dirty straw lay scattered over the ground, broken fragments of the sumptuous pine sheds, whence the Commissary so lately dispensed his stores of dried beef and cheese, with empty bottles, formerly filled with the choicest ginger-pop, were strewed on the now trodden grass. In fact, our reporter, whose appetite had been wondrously improved by the sharp atmosphere of yesterday, missed his accustomed lunch, so rapt was he with the scene. All had gone except Captain Doyle, the faithful sentinel at the gate, who still sits by the ruins of his once cosy little lodge, and holds out his hand for the pass before he will "open se same."

In front of the inclosure, by the gate and along the south side of the wall, sentinels pace to and fro as usual, but the north side appears to be wholly neglected, or left to the protection of the sentries who guard the entrance to the camp,—their position being some twenty rods from the wall at the nearest point, and about one-half of the inclosure being hidden from them by Mr. Stewart's house, and the adjoining fences and dwellings. Within a short distance from the water is an open gate, with no one to watch it, through which persons could easily enter unobserved even in the day time. The gate had a policeman to watch it when the police were on the ground, but it now appears to be left wholly unprotected.

An election was held in the camp, Tuesday, at 8 o'clock, General Hall presiding. Major Charles G. Waterbury was unanimously elected Lieutenant-Colonel of the Eighth Regiment. Obed F. Wentworth, Quarter-master and Acting Adjutant, was unanimously elected Major in place of Waterbury, promoted.

On Wednesday evening there was a drill of the first troop, Washington Greys acting as artillery. The practice consisted of taking position in front of the camp, moving simultaneously to the four different entrances of the grounds, delivering charges from the howitzers and then returning to the post. This was done by each separate piece first, and then by sections defending two entrances. After which they formed a battery and fired a Brigadier-General's salute in honor of General Hall, who was on the ground. The exercises continued half an hour.

The Eighth Regiment is to be relieved, it is reported, on Monday, and Major-General Sanford has given the necessary order for another regiment to be sent down in its place, but what regiment, is not yet known.

Yesterday, the troop practiced at target firing with one howitzer, using the ordinary canister charge. A large square target, of about one hundred superficial feet, was perfectly riddled with balls at a distance of over 200 yards.

Judging from the constant erection of new tents and other permanent arrangements, there is no intention of withdrawing the military for a long time to come. Indeed, so long as the inhabitants maintain their intention to destroy the hospitals which have been erected, and justify, as they did *en masse*, at Richmond, the burning of the former structures, the military authorities say they expect to remain upon the Island. The expense of maintaining the military there, calculating only their simple pay, and the subsistence department, amount to about $500 per day. The incidents of transportation, erection of structures and other expenses, will soon amount to a very handsome sum, and somebody will have to foot the bills.

In Quarantine there were but few arrivals yesterday, owing to the stormy northwest wind which prevailed. Four new cases of sickness were received from the steamer *Alabama*, two of which are alleged to be yellow fever. Two dead bodies were to be buried from the inclosure last evening. At last accounts Dr. Mundy was at Richmond, pressing for an injunction to prevent the Hospital physicians from continuing the practice of burying the bodies outside of the walls.

The Board of Health held no meeting yesterday, but the Ray Tompkins Guard went out for their annual target excursion, and ate a dinner together. Their practice was said to be good, and several prizes were distributed among the best shots.

City Items.

Precautions at Castle Garden.—Fifteen of the Harbor Police, under command of Captain Silvey, continue to occupy Castle Garden, to guard against the execution of certain mysterious threats that it would be burned. This establishment, which interposes such a perfect barrier between the poor emigrants and the runners and thieves who heretofore enriched themselves by plundering these helpless strangers, is, if possible, more odious to the latter class than Quarantine ever was to the Staten Islanders, and its destruction would give them full swing once more at their old trade. Under these circumstances, the vigilance of Acting-Superintendent Carpenter is spoken of as worthy of all praise. This ancient edifice was yesterday quite full of newly-arrived emigrants, who no doubt found its ample walls a grateful protection from the sharp, sweeping wind and whirling clouds of dust which prevailed.

A Blind Man robbed by Hotel Thieves.—Alfred Holmes, of Delavan, Illinois, a blind man, who recently arrived in this City on his way to Europe, made complaint at the Mayor's office, yesterday, that he was robbed three weeks ago last Monday at the Girard House of $2,035. The Police have been searching for the thief for some time, thus far without success.

Serious Accident to Wm. M. Evarts, Esq.—This gentleman, well known as a member of the New-York bar, was thrown from his horse last Saturday while riding near his country residence at Windsor, Vt. His left collar bone was broken, and his injuries will probably prevent him from engaging in his customary pursuits for a week or two.

Commissioners of Emigration.

The Board met at the office in Worth-street at 3 o'clock yesterday afternoon, President Verplanck in the Chair. Dr. Bissell and Mayor Tiemann were present.

The following is the regular weekly statement:

Number of emigrants arrived to Sept. 15	57,267
Number of emigrants arrived since to Sept. 22	2,898
Total	60,165
To same date in 1857	139,955

	1858.	1857.	1856.
No. inmates in Institution W. I	1,061	1,317	1,263
No. inmates in Institution M. H	—	164	116
Total	—	1,481	1,379

Balance in Bank Jan. 1, 1858		$32,155 89
Aggregate receipts to Sept. 15	$136,787 08	
Receipts since to Sept. 22, for commutation of alien passengers, &c	5,876 00	142,663 08
Total		$174,818 97
Disbursements as per previous account to Sept. 15, 1858	$149,400 83	
Current expenses of Sept. 8 and 15	3,731 95	153,132 78
Balance of Commutation Fund		$21,686 19

President Verplanck made a few remarks, to the effect that the report which had gone abroad that the Commissioners of Emigration had used their influence with the authorities of New-Jersey to preven the removal of Quarantine to Sandy Hook was entirely unfounded. On the contrary, the Commissioners had several years ago expressed their approbation of the removal to the State officers.

A communication was received from Mr. Garrigue, showing how far the clearing away of the ruins of the Quarantine buildings had progressed.

A resolution was agreed to, doing away with day labor and adopting the contract system for the future

Edward J. Coke was appointed Boarding-officer at Castle Garden, in place of Henry Simonson, dismissed.

The Board, through the President, Mr. Verplanck served Mayor Tiemann with a notice to the effect that there was reason to believe that threats were about to be carried out for the destruction of Castle Garden, and warning him to take measures for the prevention of such an outrage, as the State and county will be held responsible in case the place should be destroyed.

Mayor Tiemann immediately warned Acting-Police-Superintendent Carpenter to keep a strict guard upon the place, and to detail a force sufficient for its protection.

The Board then adjourned.

Commissioners of Health.

The Board met at noon yesterday.

Applications for permission to bring up to the City some cotton from the *Kate Stewart* and *P. D. Wagner* were granted.

It was resolved that the steamer *Black Warrior*, arrived Monday from New-Orleans, be granted a stream permit as soon as she was thoroughly fumigated.

A petition, asking the Board to alter its action with regard to the *Isabella Berman*, was denied.

The steamship *Alabama*, arrived Tuesday from Savannah, was allowed to come up to Pier No. 4, N. R.

The *Elizabeth Watts*, from Havana, arrived Sunday, was permitted to come up Thursday, under the rule.

The steamers *Nashville* and *Marion* were allowed stream permits, provided they were thoroughly fumigated.

The brig *George Albert*, arrived Saturday from Havana, was allowed to come to Upper Quarantine within four days from her arrival, under the rule.

Permission was granted to Captain Brown to bring up to the City some cotton arrived per *Nashville* and *Sheridan*.

Permission was granted to the owner of 20 bales of hemp, from New-Orleans per bark *C. C. Fowler*, to bring them to the City from Hunter's Point.

The following petition, signed by several hundred respectable citizens of this City, was received and placed on file:

To his Honor Daniel F. Tiemann, Esq., Mayor and President of the Board of Health of the City of New-York:

Sir: *Whereas*, on the night of the 1st and 2d inst., a lawless mob assembled at Tompkinskille, Richmond County, invaded the Quarantine inclosure, and there maliciously, wickedly, and inhumanly applied an incendiary torch to and burned down all the hospital buildings, dwellings, and offices belonging to the State; and

Whereas, This barbarous incendiarism had the effect to eject from the hospitals a large number of innocent, defenceless, and unfortunate persons suffering with yellow fever, ship fever, and small-pox, and to place them in open fields, without the slightest protection from the elements, thereby jeopardizing their lives, and exposing the whole port to pestilence; and

Whereas, This foul act of incendiarism has suddenly deprived the health authorities of the port of the necessary facilities for carrying out and enforcing the health laws of the State—for taking the proper care of infected crews and passengers arriving in this port—and for preventing the spread of pestilence throughout the City, State, and country—

We, therefore, the undersigned, citizens of the Port of New-York, do respectfully and earnestly pray your Honor, as the head of the health authorities of this City, to take the necessary steps immediately to provide at the Quarantine grounds substantial and noncombustible structures, in place of those which have been so wantonly destroyed, and which shall fully answer all the purposes of an efficient Quarantine.

New-York, Sept. 6, 1858.

The Board then adjourned to 12 o'clock to-day.

Brooklyn Items.

Fatal Accident.—John Lunnigan, a boy 17 years old, was almost instantly killed, yesterday morning, by being run over on the Long Island Railroad, near the Dépôt, in Atlantic-street. The deceased was on his way to New-York, and was about to cross the track as a train of cars which had been detached from the locomotive was passing from the funnel into the dépôt. He was notified by the flagman in season to have escaped, and probably would have done so had not a sudden gust of wind took his hat off, and while endeavoring to secure it he was knocked down by the cars, and the wheels passed over his breast. The deceased was an adopted son of Mrs. Jane Murphy, residing in Court, near Dean-street. Coroner Redding held an inquest, when the officers of the road were exculpated from all blame.

Kings County Board of Supervisors.—An adjourned meeting of this Board was held yesterday afternoon in the County Jail, President Smith in the Chair.

Brooklyn a Port of Entry.—A communication was received from Colonel C. J. Jack, asking the use of the County Court-room for three evenings, to address the citizens on the importance of making Brooklyn a Port of Entry. Referred to the Committee on Courts, with power,

Grand Jurors.—A list of Grand Jurors, numbering 1,082, was presented and adopted.

Salaries.—The Committee on Salaries reported in favor of paying the Assistant Commissioner of Jurors $1,000 per annum, and the out-door clerk the same.

On motion of Mr. Bergen, of New-Utrecht, the salary of the first-named was fixed at $700 per annum until Oct. 1 next, and after that date $300 per annum.

Mr. Bergen then moved that the out-door clerk be paid fees instead of salary, and that the matter of allowance be referred to the Committee on Laws for report. Adopted.

The subject of a new small-pox hospital was made the special order for next meeting, when the Board adjourned.

Yellow Fever.—The Health-Officer of Brooklyn has at last discovered a case of yellow fever. A woman named Donohue, in Amity, near Columbia, died on Tuesday last, after a sickness of three days with that disease. Another case was found in Warren-street yesterday. The patient was sent to the Flatbush Hospital for treatment.

Fire.—A two-story frame building, at the foot of Court-street, owned by Alexander Ross, and valued at $800, was destroyed by fire yesterday morning. The loss is covered by insurance.

Fair of the Queens County Agricultural Society.—The seventeenth Annual Fair of the Queens County Agricultural Society was held at Flushing, yesterday, and drew together an immense concourse of people. The display of cattle and horses, fruits, flowers, vegetables, &c., was exceedingly fine. Governor King and other celebrities were on the ground, whither they were escorted by Shelton's Band, drawn by 100 yoke of oxen. The Address was delivered by the Hon. David R. Floyd Jones, and was well worth listening to.

A Card from Mr. Wakeman.

To the Editor of the New-York Times.

It may be inferred from the statements of E. S. Latham, in relation to the Niagara Falls Hydraulic Company, that I had been associated in an attempt to establish a Corporation representing a large capital, when in fact it had none.

The following facts will clearly dispel any such idea:

In the early part of 1853, the law firm with which I was associated was employed to prepare the papers, examine the titles to certain lands, draw certain conveyances, and generally to attend to the formation of the Company above mentioned. During this time it was desired that we should take a small amount of stock as compensation for our services, and they would see that the installments upon the subscriptions were paid. I accordingly subscribed for fifty shares, and a written undertaking expressive of this arrangement was given me and is as follows:

> "Abram Wakeman having subscribed for 50 shares of the capital stock of the Niagara Falls Hydraulic Company, it is hereby expressly understood that he is to hold them as his own personal property, free of charge, and is not to be called upon for the payment of the same, but that we will make such payment without recourse to him.—Dated April 2, 1853.
>
> C. S. WOODHULL,
> STEPHEN M. ALLEN,
> WALTER BRYANT."

I *never* had any personal knowledge of the financial affairs of the Company. Its Treasurer resided in Boston, as I was informed, and its chief financial business was transacted there. So far as the formation of the Company depended upon the performance of our duties, it was legally organized. As to the paying in of the capital or the manner of doing it, we had no personal knowledge, directly or indirectly, and no suspicion but that everything had been done correctly. It was done without our knowledge or advice, and the alleged manner of doing it was first brought to my knowledge some three or four years after the formation of the Company.

Yours, &c.,
ABRAM WAKEMAN.

New-York Firemen Visiting Philadelphia.

Warren Hose Company, No. 33, numbering 42, men, accompanied by Shelton's Band, left this City on a visit to Philadelphia, in the 11 o'clock train, yesterday morning. Several City Fire companies escorted them to the boat, and the parade was well worth seeing. A cordial welcome, it is said, will be extended to the New-York Company by the Fire Department of the city of "Brotherly Love." The company is under the command of J. S. Craft, Foreman, and A. Yeomans, Assistant.

[BY TELEGRAPH.]

Philadelphia, Wednesday, Sept. 22.

There was a grand display by the firemen of this city to-day for the reception of the Warren Hose Company of New-York. At the wharf they were received by delegates from the various companies here, and marched to the Hibernia Engine house, where they partook of a splendid collation. The companies, to the number of sixty, then formed on Arch-street, and marched with their guests through the principal streets. The firemen are determined to make their visitors as happy as possible during their stay here.

Opening of the New-Jersey State Normal School.—This admirable School opened with over 100 pupils, and this number promises to be considerably increased during the present month.

The class of pupils is superior to any former class. More than two-thirds are young women. This School has a most thorough practical and scholastic course of instruction, and offers rare opportunities for young persons of both sexes, who design to adopt teaching as a profession. The great complaint all over the country is that teachers are incompetent, and that it is impossible to find good teachers. The Normal School is a modern institution, and to it we must look for good teachers to supply the constantly increasing demand. In the model school over 300 pupils have entered their names, and are in regular attendance.

The Republic of San Marino has awarded a medal to Miss Maria Mitchell, the Nantucket astronomer.

POLICE INTELLIGENCE.

Probable Woman Murder in the Seventeenth Ward.

Murderous Assault—Three Persons Wounded—Escape of the Assailant.—Mrs. Mary Hays, one of the occupants of the large tenement house rear of No. 199 Second-street, was assaulted yesterday morning by Geo. Simon and stabbed several times, receiving such serious injury that her recovery is deemed highly improbable. She was in the yard drawing some water at the hydrant when Simon commenced talking in an abusive manner to her. Incensed at Simon the woman struck him with a broom, the brush hitting him in the face. Simon immediately pulled a large clasp-knife from his pocket and inflicted three savage cuts upon the head and left side of the neck and another on the left side of the chin. The blade from the last thrust passed below the clavicle and penetrated the left lobe of the lung. Hearing the screams of the wounded woman, John Hermann and his wife rushed to her rescue. Simon turned upon Hermann and his wife, swinging his bloody knife about in his hand, and threatening to take their lives if they interfered. They attempted to take hold of him, when he gave Mr. Hermann two terrible cuts across the head, stabbed Mrs. H. in the right shoulder, then ran off and made his escape. A large number of persons living in the house hearing of the bloody affray, had hastened to the scene, but none had the courage to attempt the arrest of Simon. Mrs. Hays was alive last evening, but it is not believed that she will survive her injuries. Neither Mr. Hermann nor his wife is dangerously injured. The Seventeenth Ward Police have been earnest and unremitting in their endeavors to find him but thus far have met with no success. It is believed that he is concealed among some of his German friends—he is a German and so are Mrs. Hass and the other parties, and none of them speak English much—in the Ward, and he will probably not be able long to elude the officers who are searching for him. Simon was partially intoxicated when he made the murderous attack. The subject of contention between him and Mrs. Hays is not known.

Naval Intelligence.

The Paraguay Expedition and the Cromwell Steamers.—The steamers of the Cromwell line, which have been chartered by the United States Government for service on the Paraguay expedition, are the *Memphis*, *Atlanta*, *Caledonia* and *Westernport*. They are each about 500 tons burden, with a sufficient capacity for coal, after the men, provisions and armament are on board, to carry them to Buenos Ayres. Their daily consumption of coal is about 10 tons, which would drive them at the rate of 200 miles per day, at which rate they will reach Buenos Ayres inside of 30 days. They are all supplied with new machinery, boilers, propellers, wheels and engines. The upper decks will be shored up to support two guns of heavy calibre (11-inch Dahlgren pivots, weighing seven tons each) which will be carried by each vessel, and the other guns will be carried on the main-deck, for which ports will be cut in their sides. There is nothing to be done, to fit them for sea, but to put their guns and equipments on board. Their draft, properly trimmed, is 10½ to 11 feet. The four vessels will be at the Navy-Yard to-day.

Sporting.

THE TURF FOR 1858.

New-York Races.—The meeting on Fashion Course promises to be a great one. No less than eight nominations are entered in the Sweepstakes for all ages, four-mile heats. Friday, Sept. 24, same day, second race; Sweepstakes for three-year-olds; mile heats; closed with four nominations. Third race, same day, sweepstakes for two-year-olds, a dash of a mile, closed with five nominations. In these sweepstakes some of the best horses in the country are entered, and fast time may be looked for.

Union Course, L. I.—Trotting.—Match for $500 against time, the horse to trot a mile in 2:50, Wednesday, Sept. 22, to a wagon.

Mr. —— names b. g. *New-York*	won.

Time—2:55; 2:50.

New-York had two trials. In the first he failed, trotting in 2:55 in a sulky. The horse was attached to a wagon, and trotted in 2:50. There was a large attendance of spectators.

Union Course, L. I.—Trotting, Monday, Sept. 20.—Stake $125; mile heats; best 3 in 5, to wagons.

Owner, g. g. *Eagle*	1	2	1

Wednesday, Sept. 22—P. M.

The financial news from abroad continues good, and the markets all over the Old World appear to be gaining strength. The buoyancy of the French Funds, after a long period of stagnation, is the leading feature in the last intelligence from Europe. The advance within the past three or four weeks is equal to about 5 ₩ cent. The *Rente*, which stood so long at 68@68¼, is now selling at 72½@73 ₩ cent. The Bank of France reports a further gain of $6,600,000 in Bullion. English Consols have attained 97 ₩ cent., and the London Discount market is easier again. The telegraphic summary this afternoon from the *Niagara* at Halifax, is to Saturday, Sept. 11, from Liverpool. The Cotton Trade was advancing, and the feeling generally at Liverpool rather buoyant; sales of the week 67,000 bales. The private advices from Manchester, telegraphed from Halifax, are said to be very encouraging, as are also the Cotton advices from Havre.

In our own Money Market, to-day, a large disbursement in Bullion came out of the Sub-Treasury, net $675,618, of which $250,000 went to Philadelphia and the remainder into our own Banks. The Government balance here now stands $11,997,570. The Banks in the leading four cities of the country, on their last official showing, gain in Specie nearly a million of dollars. At New-Orleans the reserve is now $11,380,215, the highest figure, if we mistake not, ever attained, and quite ample for the approaching season without making the usual Fall and Winter draughts upon the North. The figures in all the departments on the last official showing are:

The Stock Market, in its general tone, was somewhat unsettled through the dealings of the forenoon, the principal drawback being a renewed pressure to put out contracts in Chicago and Rock Island shares, which touched 65½ on the street, between the two sessions of the Brokers. This influence, however, was partially overcome at the close, and most of the other Stocks assumed a fair degree of firmness. New-York Central left off at about the quotation of Tuesday afternoon, 78 ₩ cent. for the cash stock; Erie, 17⅛; Reading, 47⅝@¾; Illinois Central, 76½@77; Missouri Sixes, 84⅜; Virginias, 92½; Tennessees, 90; Michigan Southern, 23⅜; Central Michigan, 53¼, and Toledo, 32¾ ₩ cent. The dealings in Rock Island opened at 66½ ₩ cent., seller 60 days, advanced to 67 cash, then declined to 65½, and closed 66@66¼ ₩ cent. There was renewed buoyancy in the shares of the Pacific Mail Company, which finally touched *par*, sales after the printed list, closing 100@100¼ ₩ cent. The demand was also better for Panama, 113½ ₩ cent. bid at the close. The London letters by the *Northern Light* are said to advise that the arrangements for the Fraser's River Steam mail connection, *viâ* Panama, are nearly completed. The dealings in Railway Bonds show steadiness in most descriptions, though the market is of rather a retail character. Illinois Central Construction Bonds hold firm at 91 ₩ cent.; and there is a demand for LaCrosse Land Grants at 25@25½ ₩ cent.

A meeting of the holders of the Covington and Lexington Railroad Company second mortgage Bonds will be held to-morrow (Friday) at 1 P. M. at the office of John Ferguson, Esq., No. 35 Pine-street.

The October interest on the Michigan Central Loan will be paid at the Farmers' Trust Office in this City,

Messrs. E. Whitehouse, Son & Morrison advertise a small 8 ₩ cent. Loan of the City of Mobile, issued for municipal purposes.

THE

HOUSEHOLD BOOK OF POETRY.

Collected and Edited

by

CHARLES A. DANA.

1 vol. 8vo. 798 pages. In half morocco. Gilt top. $3 50.

From the Chicago Journal.

As the New-York correspondent of the Boston *Transcript* enthusiastically writes, "The elegiac composition, the exquisite sonnet, the genuine pastoral, the war-song and rural hymn, whose cadences are as remembered music, and the couplets whose chime rings out from the depths of the heart; whatever the old English dramatists, the ode writers of the reign of Anne and Charles, the purest disciples of heroic verse, the Lakists, the Byronic school—Wordsworth and Dryden, Mrs. Hemans and Scott, Shakespeare and Hartley Coleridge have made precious to soul and sense, are herein brought together; and more than this—the many isolated single notes, whose lingering harmony embalms their author's name, with the numerous fugitive 'brilliants,' heretofore of unknown parentage, cut from newspapers for the last half century—the deep, soulful utterances of heroes and mourners, lovers and exiles, devotees of nature and worshipers of art—are here elegantly garnered and chronicled."

It is just such a volume as a man may give to a woman, albeit that woman is his mother, his sister, or his wife, and is richly worth the place it claims on a lower shelf within arm's length, in the most select library."

D. A. & CO. have just published:

OFFICE NEW-YORK AND ERIE RAILROAD CO., NEW-YORK, June 11, 1858. }
THE NEW-YORK AND ERIE RAILROAD Company have earnestly endeavored during the past ten months to establish and maintain uniform and remunerative rates of traffic by the four great lines which connect the Atlantic cities and the West. Having failed in this, and believing it to be injudicious and improper to influence traffic by the issue of free passes, by the employment of runners and solicitors, or by any other underhanded means, the Company, rather than resort to such means, have determined to reduce the fares, on and after MONDAY NEXT, 14th inst., as follows: between
New-York and Dunkirk, to....$6 10
New-York and Buffalo, to.... 5 00
New-York and Niagara Falls, or Suspension Bridge, to.... 5 00

TRIESEMAR No. 1 is a remedy for relaxation, spermatorrhœa, and exhaustion of the system. TRIESEMAR No. 2 effectually, in the short space of three days, completely and entirely eradicates all traces of those disorders which copavia and cubebs have so long been thought an antidote for, to the ruin of the health of a vast portion of the population. TRIESEMAR No. 3 is a great Continental remedy for that class of disorders which, unfortunately, the English physician treats with mercury, to the inevitable destruction of the patient's constitution, and which all the sarsaparilla in the world cannot remove. TRIESEMAR Nos. 1, 2 and 3 are alike devoid of taste or smell, and of all nauseating qualities. They may lie on the toilet table without their use being suspected. Sold in tin cases, and divided in separate doses, as administered by Velpeau, Lalleman, Roux, Ricord, &c., &c. Price $3 each, or four cases in one for $9, which saves $3, and in $27 cases. Sold by Dr. H. A. BARROW, No. 157 Prince-st., a few blocks west of Broadway, New-York. Immediately on receipt of the amount, Dr. B. will forward the $9 cases of TRIESEMAR, and the large sizes, carriage paid, thus insuring genuine European preparations. The $3 cases also sent, but not free of carriage. Consultations as usual, from 11 A. M. till 2 P. M., and from 4 till 8 P. M., at No. 157 Prince-st., a few blocks west of Broadway.

DR. WATSON HAS, FOR A LONG SERIES of years, confined his attention to diseases of a certain class, in which he has treated a vast number of cases with a success which has won for him the confidence of the public. The remedies are mild, and there is no interruption to business or change of diet. Dr. WATSON receives patients in separate consulting rooms from 8 A. M. to 8 P. M., at No. 459 Broome-st., second block west of Broadway.
Dr. WATSON'S Work, THE CAUSE AND CURE, issued simultaneously in London and New-York, is the only one which clearly explains the nature and mode of treatment of the VENEREAL DISEASE in all its different forms; but treats also in full of SPERMATORRHŒA, or Seminal Weakness, and Premature Exhaustion, the result of early indiscretion, excess, or other causes. Anatomical plates of a superior kind, and drawings of every form of disease. Price $1, post paid. "Dr. WATSON'S Work has been written by a person of great practical knowledge, and we cordially recommend it."—*Medical Journal.*
Sold by the Author, as above; also by J. W. JUDD, No. 222 Broadway, and by CHARLES MILLER, No. 436 Broadway, New-York.

RICORD'S, VELPEAU'S, CIVIALE'S, ACTON'S, CURLING'S, and the Venereal Hospital Practice, of Paris and London, by Dr. LARMONT. As some persons afflicted with Gonorrhœa, Gleet, Strictures, Primary and Constitutional Syphilis, Nervous Debility, Seminal Emissions, Impotency, &c., may not be aware of the fact, he takes this medium of informing them that he is the only graduate in this City who is exclusively treating and curing those diseases, and whose connection with the European hospitals enables him to adopt the latest and most radical treatment, curing the oldest and most severe cases, at No. 82 Mercer-st., corner of Spring, opposite St. Nicholas Hotel, from 10 A. M. till 9 P. M., except Sundays, unless by appointment. The Doctor's MEDICAL ADVISER AND MARRIAGE GUIDE, nearly 400 pages, 100 picture illustrations, is $1. Sold and mailed, also, by J. W. JUDD, No. 222 Broadway, New-York. It gives the advertised medicines, and should be seen by the married, single and the afflicted, before adopting any treatment, as it fully exposes the charlatans infesting this and other cities.
We commend Dr. LARMONT to the afflicted.—*Courrier des Etats Unis, Staats Zeitung, Day Book, Atlas, &c.*

NO MORE DOUBT.

QUESTION SETTLED.

We suppose it is natural for every pullet to think that the last egg which was dropped from her feathers is the whitest, the roundest and the largest egg in all pulletdom, and we know it is common for every man to consider his last particular improvement as the summit of human achievement, and to herald his tin whistle as the loudest trumpet ever sounded on the field of battle. But having devoted the thought, investigations and most of the labors of the last eight years to the development and perfecting of a series of Remedies for the People, and having witnessed the good effects of these Remedies in hundreds of instances, and received the congratulations and testimonies of scores of others to the same purport, we think we are authorized to spread the matter before the people and claim a triumph for our common humanity. For if disease may be warded off and prevented by the parent or nurse with a box of sugar pills, and if grave diseases can be cured by medicines not only innocuous and harmless but tasteless and pleasant alike to invalid and baby, humanity has certainly gained somewhat.

We present this series of Specific Remedies as the result of our labors, and we claim for them these advantages:

THEY ARE HARMLESS.

In no instance do they produce injury, neither to sick or well, old or young.

THEY ARE SIMPLE.

You always know what to take, and how to take it. The system *is divested of all intricacy and technicality*, and brought down to the wants of every-day life.

THEY ARE CONVENIENT.

A thousand times some little curative is needed when you could not go to the doctor—have not the time or the money to spare, for doctors are sometimes an expensive as well as distant luxury.

THEY ARE EFFICIENT.

Thousands have been cured by them. Read the testimony. You often cure at first with the ounce what you afterward could not relieve with a pound.

HEAR WHAT THE PEOPLE SAY.

None are so well qualified to give evidence as those who speak from experience, and testify unbiased by interest.

James H. Porter, Amityville, L. I., writes:

Amityville, June 5, 1858.

Dr. Humphreys—*Dear Sir*: I should be doing violence to my own feelings, as well as injustice to the community, did I withhold from you the great cures which your Specific Remedies are performing in this community. I have only had the agency of your valuable preparations a few days, and yet, within the last ten days, I have cured three very bad cases of Dysentery, each cured within twelve hours of commencing to take the remedies; in fact, the benefits were perceptible within one hour after commencing the use of the medicine; and, so prompt and thorough was the cure, that the persons hardly believed their own feelings. One very bad case of Cough, of four months' standing, was entirely cured in a few days, and there has been no return whatever. Also, one case of Piles, of over twelve years standing, was very much relieved within one week, by simply taking your Pile Specific, with every prospect of permanent cure.

Our people are beginning to realize the difference between the drugging and sickness of the old system, and the taking of your little sugar pills and prompt restoration to health. Please send me copies of your recent Journal, &c. Very respectfully,

JAMES H. PORTER.

JUST WHAT THE PEOPLE WANT.

No great public want can long remain unanswered. When a condition of things has become developed so that a great public want is realized, either in theology, civil government or physics, that very want or demand is sure to create a supply. The hour will create the man, and the need the thing. Witness the sewing-machine, the reaper, the telegraph. There may be several abortions. Many may run before they are sent, but ultimately humanity will triumph, and the want be supplied.

It cannot be that Medicine will long remain what it has been, a mass of intricacies, of which they who know most know little, while the confident pretender is sure to be a knave. Nor will it be always a system so intricate and obscure that only the priests of the temple can speak its language, or interpret its symbols, or an oracle so equivocal that he who consults the priest fares as illy or worse than he who abjures the temple altogether. There must ere long be a system that comes down to the wants of humanity in every-day life, that meets the wants of the mother at her cradle, the nurse at the bedside, the father on his journey, or the sailor on the sea. Something, or some system that everybody can have, and everybody can use, to arrest the first invasions of disease, and to restore the ruddy current of life ere its fountains are vitiated and its forces undermined.

Old-school medicine, with its crude drugs and poisons, can never meet this want. That is a game long since played out, a thing well understood. Equally futile the vaunted panaceas and elixirs which ignorance has begotton and folly sustained. The water-cure can never be more than a doubtful expedient or useful palliative in the hands of the people. Nor can the usual form of Homœopathy, however large its domestic manual, or complete its assortment of tinctures and pellets, be ever anything more than an amusing pastime in the hands of the people. The system was never designed for such use, and can never fill such a place.

Does our system of Specific Homœopathic Remedies meet this want? It becomes one to speak with modesty of his own productions; yet we but echo the sentiment of thousands who daily use them, and have long experienced their efficacy in a thousand varying occasions, when we say that they are just what the people want, economical, simple, prompt, reliable, and yet without danger in their use. For this they were designed and intended—to serve as the ready resource of the mother and nurse, to meet the wants of the home and fireside, as well as to be the companion of the traveler. To be, in fact, the great system of popular medication divested of all intricacies and technicality, and brought down to the common use and level of every-day life. For this end we have expended several years of labor and study, to say nothing of money, and in this aim we trust to succeed; a success of which any man may be proud.

LETTERS FROM THE PEOPLE.

Cyrus Marsh, Second, of Natchez, Miss., writes:

Natchez, May, 1858.

Dr. Humphreys—*Dear Sir*: The invoice of your Specific Remedies, which you sent me from Utica some two months ago, is all sold, and might have been much sooner, had I given any particular attention to the subject. So far as I have learned, they have rendered the purchasers good satisfaction. I have used them in my own family with the most gratifying success, and would not be without them on any account. I herewith indorse draft, the amount of your previous invoice, and beg you to ship me, *viâ* New-Orleans, one dozen $4 cases, $2 do., and 25 dozen of the single boxes, with directions, and for which I will remit on receipt of invoice. Truly yours,

Cyrus Marsh, Second.

From C. D. Mead.

Otsego County, N. Y., July 20, 1858.

Dr. Humphreys: Your medicines are giving increased satisfaction to those who have used them most, and who know most about them. There are three cases of which I wish specially to speak, as follows:

Neuralgia.—Mr. A. B. J., of this place, was attacked one year ago this Spring with this distressing complaint in his head, face and teeth, together with a diseased stomach, so as to unfit him for labor for several weeks, and was, during much of the time, confined to his bed. By taking less than one box of Neuralgia Pills and a few of your Dyspepsia Pills, he was entirely cured in a very short time, and has had no return since.

Piles.—A middle-aged woman in this place, who has been afflicted with Piles for some time, and who failed of being cured by a physician who is called skillful in this complaint, was cured in a very short time by taking less than one box of your invaluable Pile Pills.

Another.—Mr. R. B., of this place, who last Fall was cured of an inveterate cough and cold, which threatened to end in a quick consumption, by the Cough Pills, had been suffering for a few weeks past severely with blind Piles, and was induced by me to try your Pile Pills. His son told me, last First Day, that he experienced entire relief in forty-eight hours, to his complete astonishment and delight. I could fill a sheet and more, in giving instances of the success of these remedies in cases of Coughs, Colds, Croup, Worms, Dyspepsia, Fever and similar diseases.

Thine truly, C. D. MEAD.

From N. Huntington, Rochester, N. Y.

Prof. Humphreys: I most cheerfully record my opinion of the use and value of your Specific Homœopathic Remedies.

In the Autumn of 1855, I was suffering from a chronic diarrhœa, contracted on the Mississippi, and was also alarmed by symptoms of inflammation, so as to seek medical advice. A dose of calomel and rhei was prescribed. But in calling on the druggist, who was only an agent of your remedies, and having seen favorable notices of them, I changed my course, purchased a case, and commenced taking the Diarrhœa Pills, and subsequently the Dysentery Pills, according to your directions. In a few days I found my complaint entirely subdued, and have had since very little trouble with the difficulty.

Subsequently I had a young man attacked with violent dysentery, who first applied to a physician, but without success, when I procured him a box of your Dysentery Pills, which he used according to the directions in your little Manual and was quite well and about again in three days.

A Mr. C., aged 23 years, was attacked the second time with erysipelas, (crusty eruption,) the entire scalp being covered with blisters, was suffering extreme pain, with high fever and rapid inflammation, and was in a very critical condition. He took from my little case of your remedies, your Salt Rheum Pills, according to your Manual, and in three days was able to attend to his business, became well, and has not had a return of the complaint since, now two years.

I have used other remedies of yours in cases not so marked, and have found them highly useful, especially the Fever Pills, which I consider invaluable.

Rochester, N. Y. Feb. 18, 1858.

Our unprecedented large sales of your medicines show that they give entire satisfaction to our customers. Were it necessary, we could give a large number of remarkable cures effected by them. But their efficacy in relieving and curing disease is too well established in this community to require any such certificates.

A. & J. E. Bell,
Dexter, Jefferson Co., N. Y.

From Prof. W. Morris, Rochester, N. Y.

Prof. Humphreys & Co.—*Dear Sirs*: Your Homœopathic Specific Remedies have most efficiently superseded all other kinds of domestic medicines, wherever their adaptations and virtues have become known.

I have had much pleasure in commending them, from personal experience, to many of my friends, and have done so with full confidence in the correctness of you composite theory, and of the principles on which your specifics are prepared. My observation of the results of their use has been rather extended, and these results I have found to be invariably beneficial, and of the most satisfactory kind.

Dr. F. Humphreys—*Dear Sir*: Some months since I received from you a case of "Specific Homœopathic Medicines."

I am happy to say that I have used the remedies for myself, my family and friends, with decided and beneficial results. So much so that in every instance a case of the remedies has been desired and purchased of your agent. I could give many instances of almost instantaneous relief, and of attacks of fever arrested in a few hours by their use, but it is unnecessary. Please accept my thanks for the case so kindly sent me, and be assured I shall most cordially recommend a preparation so powerful for good.

Wishing you great success in your effort to diminish the ills to which human flesh is heir.

I am most truly and fraternally yours,

Allen Steele.
Pastor of M. E. Church, New-York.

Professor Humphreys—*Dear Sir*: Some time early last year my name was given to you by my friend Mr. G., of your City; thereupon you sent me your journal. After reading it I was induced to purchase a case of your medicines from your agent here, Mr. Radde, and have continued to use them in my family ever since with the best of success—especially with children—so that I now feel that I would not be without them under any circumstances, and can rely upon them with a *great deal of confidence*. Inclosed please find $6, for which send me a $4 case containing vials which I have seen mentioned in the Journal, and a $2 case for a friend, and much oblige yours truly,

New-York, Oct. 7, 1856. A. Maxwell.

Mrs. H. E. Walker, No. 42 Silver-street, Boston, writes:

Dr. Humphreys—*Dear Sir*: I have now used your medicines in my family about four years, and with the blessing of God have carried my children, three in number, through the Measles, Mumps, Chicken-pox, Whooping-cough, and my youngest the Scarlet Fever, without ever having a physician in my house. I have also given your Specific Remedies to my friends in many instances, and have always been gratified with prompt and satisfactory results. I think if your remedies could be obtained in Boston large quantities of them could be sold, as there are many who would make use of them at once.

Very respectfully, Mrs. Helen E. Walker.

CURES BY IMAGINATION.

It is often urged against Homœopathy, that it cures through imagination. Its cures are no cures, only its patients imagine they are cured. But is it not a little singular that imagination should be so potent to cure with our small doses, and so impotent to cure with the large ones of the old school? If the principle were good for anything, the larger the dose, the more imagination should cure, but the converse of the proposition proves its falsity. But we cure children, even infants, a year, a month, or a week old. How about imagination in their case? It is also well known that our treatment is very successful in the cure of horses, cattle, and other animals. Does imagination cure them? The most successful veterinary surgeons of the day are those who use Homœopathic remedies exclusively in their practice, and several of the largest equestrian troupes of horses are entirely under the same practice, experience having shown the immense superiority of this treatment for animals. We shall have to invent a new intellectual system for this order of beings, or confess that the imagination theory of cure is exploded.

Little observation is sufficient to show that the beginnings of disease are usually trifling. A slight cold, then cough, and more cold, from time to time, and at length we have a settled irritation of the lungs, bronchitis, and finally incurable consumption. An acid stomach, frequent usings of food, irregular discharges unheeded and neglected, and at length we have settled dyspepsia, hypochondria and piles, and hopeless disorganization, as the final results. So in childhood. Frequent earaches unrelieved, then discharges from the ear, and permanent deafness. Weakness, pain and weariness in the back and limbs, unheeded and uncured, and you have ere long sciatica, lameness, or permanent distortions of the spine. So of almost all serious maladies.

Now, all these diseases are *curable*—easily, readily curable, IN THEIR EARLIER STAGES. These trifling pains and ailments would be of no consequence, only they are the avant courriers of the more formidable enemies just in the rear. These slight pains and ailments, are the distress-signals which nature hangs out for relief.

Here is where our beautiful system of specifics so appropriately comes in, with means simple, harmless and pleasant. She at once arrests the progress of disease, and stops it short before it has had time to demonstrate itself in the system. There is not only a present inconvenience relieved, but the entire organism is strengthened and protected. There can be no question that the general influence upon the constitution is most beneficial.

If there is a greater humbug than this we have yet to see it.

Much of ridicule has been heaped upon homœopathy on account of the exceedingly minute form of the remedies which it employs. But the most refined dose of phosphorus or iron which we administer is still not so fine or attenuated as the phosphorus or iron that exists, serving its proper office in the human brain or blood, nor so refined as the miasma of cholera or yellow fever, which sweep down their thousands yearly. Has any one weighed the quantity of small-pox, of scarlet fever or of measles virus necessary to communicate the disease or destroy the victim—and if disease in its origin or essence is so immaterial, is it absurd to cure it with doses equally immaterial or imponderable? Time is not very distant when it will be very absurd to attempt the cure of disease in any other manner. If a plant to be benefited by a fertilizer must needs receive it in a refined or attenuated form, much more so delicate a structure as the human economy can only profitably receive it after having been prepared in a manner analogous to that which renders the fertilizer a proper pabulum for the plant. That our preparation of medicines does so prepare them is not only demonstrable from the nature of the process itself, but from their beneficial effect as conservators of life.

From Cyrus Burhens, Esq., Saugerties, N. Y.

Your Remedies have effected many cures here. No. 7 has proved an excellent PREVENTIVE as well as CURE for coughs, colds, &c.; No. 10, for dyspepsia, and No. 9, or Headache Pills, have certainly given the best satisfaction. The same can be said of your Rheumatic, Salt Rheum and Dysentery Remedies; and the frequent calls for Opthalmy Pills give sure evidence of their efficacy in cases of sore, weak or inflamed eyes. As a series of Domestic Remedies, they are unequaled.

Here is our list of Remedies, and some of the cases cured by them, and a part only of the testimonials given of them. We could fill pages with them, if we were careful to gather them up or preserve them, but want of space forbids. What is said of Dysentery, Cough or Dyspepsia Specific could also be said of the remaining medicines in the list.

No. 1.—FEVER PILLS.

For Fevers of all kinds, Inflammatory, Rheumatic, Bilious, Congestive and even Typhoid Fever. Inflammations and Congestions of the Head, Chest, Liver, Lungs, Pleura and Bowels, Stitches and Pain in the Side or Chest, Palpitations of the Heart, Fevers of Children, Worm Fevers, and all diseases attended with QUICK PULSE, RESTLESS TOSSING and ARTERIAL EXCITEMENT.

This is the only popular remedy offered for that most frequently recurring as well as dangerous condition—*Fever* or *Inflammation*. No other remedy equals it in *reducing the force and frequency of the pulse, relieving heat and producing perspiration.*

Congestion of the Chest.—A stout young man, some 20 years of age, laboring daily in the open air, complained of pain in both sides, in deep inspiration, a constant sensation of weight and heaviness in the chest, and labored breathing. He had a hard, severe cough, and quickened pulse, complained of depression and weakness. This state had existed nearly two weeks. He commenced taking Fever Pills—one pill three times per day. After two or three days he found himself much better, and in two weeks had quite recovered.

Measles.—A young man at Cooper's Plains was taken down with measles, attended with very severe congestive symptoms, and was regarded in very great danger for twenty-four hours. He received from our agent simply our Fever and Cough Pills, and in three days was able to again go about his business.

Scarlet Fever.—A gentleman of Fleming, Cayuga County, informs us that he considers our Fever Pills of inestimable value in this disease. He sold a case of the Remedies to a family where the children were down with the Scarlet Fever, and, after a trial of them, they were satisfied that there was nothing better for that disease than the Fever Pills. The family, numbering some six children, all had the disease which prevailed around them, and during the entire course with the several children, they simply gave the Fever Pills dissolved in water, a dessert spoonful of the fluid, made in the usual form, every two hours, and, without calling a physician, all were promptly and permanently restored to health, and are firm believers in the value of the Specific Remedies. There were two other cases in the immediate neighborhood where large families of children were safely carried through the disease by the use of the same remedy, without the aid of a physician.

A child of 4 years, in the country, was attacked towards sundown, after playing out during the day, with a most violent fever—face red, head and body hot, throwing off a glow of heat, pulse quick, raging thirst, and restless tossing and wild talking, made up this frightful picture. The father dissolved two *Fever Pills* in one glass of water, and gave a spoonful every hour. By 9 o'clock she was more quiet; at 10, perspiration began to appear, and she dropped to sleep. At midnight she was sleeping quietly, and long before morning all went to rest, and the child awoke at breakfast time, pale, fatigued and feeble, but the fever all gone, pulse quiet, and skin cool, and by the next day could be considered as well.

Cases like the above occur every day, and almost hourly; and had Homœopathy done nothing more than to give the world a mild and pleasant medium that reduces *fever* so promptly and safely, it would have deserved the blessings of mankind.

No. II. WORM PILLS.

For all Worm Complaints in Children or adults, Worm Fever, Worm Colic, Voracious Appetite, Picking at the Nose, Wetting the Bed. A pleasant, safe and rational remedy. Other Worm medicines, while they are very repugnant and difficult to be given to the child, only drive off a few worms, while, by weakening the bowels, they induce the rapid growth of more worms, so that no real good is done. This medicine, by curing the condition on which Worms depend, of course radically cures them, and is not only safe, but the only way in which worms can be destroyed, and the system perfectly cured. It has cured when all other medicines have failed.

No. III. BABY'S PILLS.

For all complaints of Infants and Young Children, such as Colic, Crying, Worrying, Sleeplessness, suffering from Teething; also, for slow growth, debility and general feebleness of children, these pills are a true panacea. They contain no opium or anodyne, and yet quiet and calm the system, relieve colic and the irritation of teething, and induce a pleasant and natural rest, without the disadvantage of opiates or drugs. Many old nurses, who know their value, will not nurse lying-in-women without them.

HUMPHREYS'
SPECIFIC HOMŒOPATHIC
REMEDIES,
FOR DOMESTIC AND PRIVATE USE.

HUMPHREYS & PALMER,
No. 562 Broadway, New-York.

The question is frequently asked, Wherein do your specific medicines differ from the usual Homœopathic preparations? We answer, They are medicines for *particular diseases*, or that general aggregation of symptoms constituting a particular disease, and specifically adapted to its cure. Other Homœopathic Medicines are general remedies, which may be applied, in the hand of a skillful practitioner, to a greater variety of morbid conditions, but a proper application of which requires an intimate knowledge of the nature and characteristics of the medicine, and an equally intimate knowledge of the peculiarities of the disease and patient—a knowledge which an amateur always finds it difficult, and often impossible, to possess. So that, while Specific Medicines are easily and readily applied, the usual Homœopathic Medicines are selected with great difficulty and doubt. For instance, while everybody knows what a *cough*, a *headache*, or *diarrhœa*, or *suppressed menstruation* is, yet but comparatively few know, and all will find it difficult to learn, what are the characteristic indications for the use of *Mercurius*, or *Belladonna*, or *Pulsatilla*, &c.; and without this knowledge the medicine cannot be prescribed with precision. The action of the remedies in both cases is the same—the principle upon which they cure the same—ONLY IN ONE CASE THE KNOWLEDGE, SKILL AND EXPERIENCE OF THE PHYSICIAN ARE EMPLOYED IN ADAPTING THE MEDICINE TO THE DISEASE, AND IN THE OTHER THE AMATEUR, WITH HIS BOX AND BOOK, SEEKS TO DO IT FOR HIMSELF.

Our medicines are put up in larger pellets than those usually employed by Homœopathic physicians, because they are more convenient to take than small ones, and because they retain the medicine much more firmly, and for a longer time, than in the shape of smaller pellets.

Some persons object that if they have a case of remedies in their house, being so pleasant to take, they or their children are constantly dosing themselves with sugar pills. But why not? If they have a headache, or pain, or cold, or other ailment, trifling though it may seem, is it not better for them and better for all that it be relieved? Nothing is gained by permitting it to continue—but the contrary. Such trifles are often the *avant courriers* of serious and life-periling diseases. And if you can relieve such sufferings by harmless Sugar Pills, you should accept the blessing gratefully, rather than be obliged to employ the poisonous drugs so often resorted to.

NO. IV. DIARRHŒA PILLS.

For Summer Complaint, Loose Bowels, Diarrhœa and Cholera Infantum; unquestionably the safest and most valuable remedy known for these complaints, either for adults or children, and invaluable to those traveling. These complaints, it is well known, carry thousands to their graves every Summer; and it is almost equally well known that anodynes, opiates and drugs generally do as much harm as good. This remedy acts promptly, by checking the evacuations, restoring them to a healthy character, and thus curing the disease. Thousands have been cured by it every season since its introduction to the public.

Cholera Infantum.—A child had suffered some four weeks from loose bowels, together with general feebleness and emaciation. One of the first Homœopathic physicians in the City had given it several prescriptions to no effect. A box of Diarrhœa Pills, one pill four times per day, perfectly restored the child in three days.

Cholera Infantum.—A child of eighteen months was teething, which was accompanied with loose bowels, pale, sickly face, emaciation, wrinkles in the neck, sunken expression of the face, crying, petulant and fretful mood. It had become quite weak and prostrate, and was considered in a dangerous condition. A Diarrhœa Pill, given three times per day, and one of the Baby's Pills for its restlessness at night, entirely cured it in two weeks, so that it regained its wonted humor, appetite, playfulness and strength.

Cholera Infantum.—A child had suffered some four weeks from loose bowels, together with general feebleness and emaciation. One of the first Homœopathic physicians in the City had given it several prescriptions to no effect. A box of Diarrhœa Pills, one pill four times per day, perfectly restored the child in three days.

Diarrhœa and Cholera Infantum.—A child, two years old, came up from New-York, where it had been suffering all Summer with diarrhœa and frequent vomiting. It was quite emaciated, pale, ashy countenance, stools several times per day, thin, loose and very offensive, and frequent vomiting. Cordials and old-school drugs had only partially checked, not cured or controlled the disease. A Diarrhœa Pill three times per day entirely cured it in less than a week.

When it is recollected that 200 children died last week in the City of New-York of Cholera Infantum, to say nothing of those reputed as dying of other diseases induced by this, the importance of a remedy for children in the form of pleasant Sugar Pills, which promptly *cures the disease*, cannot be estimated. We could cite hundreds of cases of cures did space permit.

No. V. DYSENTERY PILLS.

For Colic, Gripings, Dysentery or Bloody Flux; a sovereign remedy, invaluable in the hot seasons and Fall of the year. Dysentery is known to be one of the most fatal diseases of our country—often quite baffling the ordinary means of cure, yet persons have volunteered their testimony—showing that in every instance, and the worst possible cases of *Bloody Dysentery*, this remedy has not failed to perfect a cure.

CASES.

I. A gentleman of 45, florid complexion, full habit, getting his feet wet and cold, in the rain, was attacked with Dysentery of a violent character. It was attended with frequent calls to stool every 15 minutes or half an hour, with discharges of only mucus and blood accompanied by violent colic, cutting pains and severe tenesmus or straining, also considerable heat, coated tongue and quick pulse. A dose of oil and then of cordials had produced no relief. He commenced taking the Dysentery Pills, one every hour, with prompt relief, and the third day was able to be out.

II. A child four years old had Dysentery for three days, stools every two hours, of blood and blood-stained mucus, colic, griping and cries. A Dysentery Pill every 2 hours entirely cured the case in 24 hours.

III. A young lady of 20 was attacked with severe Dysentery, her bowels moving 15 or 20 times per day, attended with severe griping pains and violent tenesmus. The stools were mostly blood, and bloody mucus, at times resembling scrapings; considerable fever and prostration. The Dysentery Pills, one every hour, entirely relieved the pain, and arrested the discharges in 12 hours, and the day following she considered herself well.

IV. A gentleman of 40, large and robust, while traveling in Michigan, was attacked with Dysentery, commencing with a sensation of weight and heaviness in the lower bowel and desire to stool, soon followed with griping and cutting pains in the abdomen, and thin, watery stools, frequently repeated, with tenesmus. He commenced with the *Dysentery Pills*, with which he was fortunately provided, and found relief from the first pill. Continuing their use, he was entirely relieved in 24 hours.

V. A gentleman had been exposed while hunting and fishing for several days, and was attacked with all the usual symptoms of *Dysentery*, colic, griping, pains in the bowels, followed by a desire for stool, following each other with but little intervals. Stools thin and scanty, attended and preceded by pain and tenesmus. A Dysentery Pill every two hours soon relieved and vanquished the entire disease.

VI. A child of 18 months, teething, considerable fever and heat, frequent cries from colic, with drawing up of the feet and restless tossing, frequent stools of mucus and blood, streaked mucus with straining, soreness about the anus. Dysentery Pills dissolved in four teaspoonfuls of water, every hour. Cured in two days.

What more need be said on Dysentery, *here is the remedy*, MILD, PLEASANT, EFFICIENT.

No. VI. CHOLERA PILLS.

For Cholera, Asiatic Cholera, Cholera Morbus, Nausea and Vomiting also with Diarrhœa; efficacious both to prevent an attack and as a cure. No better or safer remedy can be found, either as a preventive against Cholera, or to cure an attack which has come on. It is equally efficacious against Cholera Morbus, Nausea and Vomiting, even in case of pregnant females, or arising from any other cause.

No. VII. COUGH PILLS.

For bad Colds, Coughs, Hoarseness, Influenza, Bronchitis and Sore Throats. Bad Colds, neglected or frequently repeated, often lay the foundation of Consumption, Bronchitis, and premature decline. Though there are many remedies advertised as prompt and speedy cures, yet none so safely and yet speedily and surely effect a cure as this. Often a single pill, taken at night, has entirely relieved the system of a severe and threatening cold by the morning.

No. IX. HEADACHE PILLS.

For Headaches of all sorts, Sick Headache with Nausea and Vomiting, &c., for Vertigo, Fullness, Heat and Swimming of the Head, Vanishing of Sight, Numbness, &c. No one, subject to this distressing affection, should hesitate to give this simple medicine a trial. Hundreds of cases have been permanently cured by it. It often averts the attack entirely, and destroys the predisposition to a return when properly followed up.

HUMPHREYS'
SPECIFIC HOMŒOPATHIC
REMEDIES,
FOR DOMESTIC AND PRIVATE USE,

HUMPHREYS & PALMER,
No. 562 Broadway, New-York.

Old School Physicians, unable from the mass of testimony to deny the numerous and important cures made by Homœopathy, yet attribute these cures entirely to diet and imagination. But, my good Sir, did it never occur to you how much better it is to cure by diet and imagination than with calomel and the lancet? And if disease can be cured so promptly and well with Sugar Pills, diet and the imagination, are you guiltless in torturing your patients with blisters and dosing them with quinine, iodine, strychnine and other poisons, the effects of which you know are so destructive?

If 25 cents will purchase for you a proper physician's prescription for a diarrhœa, dysentery, headache, bad cold, dyspepsia, or bilious complaint, or if 50 cents will procure you a true specific for fever and ague, or piles, why should you spend your time to dance attendance on the doctors at the tune of a dollar each for something quite problematical as to its value? Are you like the man who was afraid to use his own nose, lest he should breathe through an improper tube?

NONSENSE! HUMBUG! MOONSHINE! QUACKERY!

We answer in the words of a recent writer, quite applicable to this subject: "To damn with an epithet is the shortest form of logic. Call Abolitionist the man who sets his face with a sudden resoluteness of energy against the aggressions of Slavery; call fanatic the earnest advocate of any great truth, or opponent of any great error; pronounce enthusiast all men of strong and hopeful convictions, and you have achieved a surer victory than the syllogisms of Aristotle could afford you. It is a short way with all sorts of dissenters. They may disprove your facts, expose your fallacies and refute your arguments, but by a talisman, all the glory of the contest remains your own. The recipe is no secret, or we might conceal it for private use. It is in daily practice. It operates like an opiate on all the otherwise decided movements of the day. It crushes enterprise, condemns the earnest and patriotic to obscurity, and leaves the stage for knaves and fools, the Punches and Judies of routine, to caper upon."

REMEMBER,

That our system of Specifics divests the private or domestic practice of Homœopathy of all intricacies and technicalities, and places its mild and benign results within the reach of every individual at a very moderate outlay.

No. X. DYSPEPSIA PILLS.

For Weak Stomach, Liver Complaint, Heart Burn, Spitting up of Food, Flatulence, Coated Tongue, Bad Taste, Loss of Appetite, Costive Bowels, Bilious complaints, Kidney Complaints, Sore Mouth of nursing women, Vomiting and Morning Sickness of pregnant females, &c. A multitude in every community suffer from these and kindred evils, against which the usual remedies at best only palliate, while in most cases they aggravate and even render them incurable. A trial even of a single Pill, in any of the above cases, will satisfy the most incredulous of its great value.

Dyspepsia or Weak Stomach, Case 1.—A young man of 19 had Dyspepsia for two years, attended with a severe pain in the pit of the stomach, coming on during eating or as soon as food reached the stomach, and continuing through the period of digestion. The pain was severe and aching, sometimes extending to the shoulders; less if he eat very digestible food, and proportionably more violent as his food was less carefully selected. It was also worse during warm weather. The bowels were very costive—stools hard and dry. Allopathic medicines only made him worse, and the prescriptions of a very regular Homœopath failed to help him. He commenced taking the Dyspepsia Pills, one pill three times per day, with prompt relief. In little more than a week this pain of two years' standing had disappeared, and in a month more his bowels had become perfectly regular and he was entirely well.

2. A young lady of 26 had been troubled with indigestion for several months, so as to render great care necessary in the selection of her food. After eating, the stomach became acid, food rising in her mouth with water, and an unpleasant, heavy, load-like sensation in her stomach, continuing some hours, frequent headaches, bowels constipated, and a depressed mental condition. She commenced taking the Dyspepsia Pills, one morning and night, and in less than a week almost every symptom of her disease had vanished, and she felt like a new being.

3. A gentleman somewhat advanced in years, strong, robust constitution, had lately been a good deal affected with indigestion, weak stomach, coated tongue, bad taste in his mouth, and attended with a peculiar vertigo and whirling in the head, so much so as to render his riding in a carriage or even mounting an eminence quite dangerous. After trying several things ineffectually, he fell upon the Dyspepsia Pills, which afforded prompt relief. A pill every night and morning works like a charm, relieving all his vertigo and other unpleasant symptoms.

Piles and Dyspepsia.—A young gentleman had been for some months afflicted with *Piles*. They were internal, very painful, and bleeding at every stool. His stomach was also very weak, food lying like a load, and frequently rising in his mouth, sour or bitter, distress after eating, flatulence and costive bowels. He procured, after trying other remedies with only temporary effect, a box of our *Homœopathic Dyspepsia Pills*. This he did in opposition to the advice of his homœopathic physician, who told him that "the *Pills* were a humbug," &c. He, however, found himself relieved from the first dose, and in the course of four or five weeks considered himself pretty well of all his ailments, having used no other medicine.

No. XI. FOR FEMALE IRREGULARITIES.

For suppressed, scanty, delaying or painful Menses, for Whites or Leucorrhea, with too scanty Menstruation, Headache, and other sufferings during the period. Ladies who suffer from these difficulties, and know how unpleasant it is to describe them to a physician, can appreciate the value of a simple, yet efficient remedy, which they may always have at hand and apply at pleasure.

No. XII. FEMALE PILLS.

For Female Weaknesses, Leucorrhea, or Whites, too profuse or long-continued Menses, or Female Hemorrhage, Bearing Down, or Prolapsus Uteri. Full one-third of the females of this country suffer from these diseases, and against them the ordinary remedies are useless or worse. Any case of Leucorrhea, however inveterate, will be benefited by them, and a single box taken according to directions will do more good than the whole bottlefuls of Catholicon and other expensive nostrums.

CASES.

I. A lady of 30, of good constitution and active temperament, had suffered from Leucorrhea for several years. The discharge was at times profuse, yellowish, most after and before the menstrual flux, attended with a constant heavy dragging down pain across the loins, rendering her so weak and depressed as to be scarcely able to keep about. All the remedies heretofore tried were of no service. She began taking the Female Pills, one night and morning for over a week, then only one per day, and in less than a month found herself entirely free from these tedious, and, as she supposed, life-long difficulties.

II. A lady of 45 had suffered for several years with profuse Leucorrhea, attended with bearing down, to such an extent as to unfit her for any active duties, and to prostrate her entire nervous and muscular system. She had gone the round of Allopathic washes, tonics, injections and supporters to little purpose. In using less than three boxes of the *Female Pills* her leucorrhea entirely disappeared, her bearing down was vastly relieved, and her general strength and the tone of her nervous system quite restored. She says "No one can imagine the immense benefit she has derived from those trifling two boxes of pills."

III. A lady, aged 35, had been for two years afflicted with a severe form of leucorrhea, and for which she had employed several medicines to no purpose. The discharge was profuse, yellowish and thick; more before and after the menses; often quite irritating, and attended with severe aching pain across the loins and back, and rendering her quite weak. The menses were regular but profuse. She commenced taking the *Female Pills*, one night and morning, with very prompt relief. In a few weeks she found herself almost perfectly free from the discharge, the pain in her back gone, and her strength quite restored.

No. XIII.—CROUP PILLS.

For Croup of Children or Adults, Hoarse, Croup-Cough, Oppressed, Wheezing Respiration, &c.; used both as preventive and cure. The control of this dangerous disease by Homœopathic Medicine is well known. Yet no other Homœopathic remedy is so simple or efficient as this.

No. XIV.—SALT RHEUM PILLS.

For Erysipelas, Salt Rheum, Eruptions on the Face, Cheeks, Ears or Hands; Pimples on the face of young People, Milk Crust, Barber's Itch, Scald Head, Old Ulcers, Sores and issues on the legs or other parts of the system. Hundreds of persons are using these Pills for Salt Rheum with most triumphant success, while hundreds also have been relieved and cured.

No. XV.—RHEUMATIC PILLS.

For Acute or Chronic Rheumatism, Pain, Lameness or Soreness in the Back, Sides, Chest or Extremities, Sciatica or Pain in the Hip, Leg, &c. This remedy rarely fails to relieve the worst cases of Rheumatism, while it is indispensable for the slighter attacks of Rheumatic Pain and Soreness, which are constantly liable to occur.

☞ The above 15 numbered boxes are put up in neat cases with a book of directions at $2, and sent free of charge to any part of the country, by mail, on receipt of the money. Single boxes, with directions, 25 cents; six boxes, $1.

HUMPHREYS'
SPECIFIC HOMŒOPATHIC
REMEDIES,
FOR DOMESTIC AND PRIVATE USE.

HUMPHREYS & PALMER,
No. 562 Broadway, New-York.

Professor Humphreys may be consulted at his office, No. 562 Broadway, on all diseases of the human system, from 8 A. M. to 8 P. M. Patients may also consult him by letter, sending a full history of the case, symptoms, &c., and the medicines will be returned by letter.

HUMBUG.

Much is said in these days about "humbug," and "being humbugged," and the term is not unfrequently applied to Homœopathy and its practitioners. But can there be a more perfect humbug than to drain one's blood, blister him, or fill him with villainous, poisonous drugs, under the pretence of benefiting his health?

SPECIFICS IN LARGE BOXES.

For the following diseases, 50 cents each:

HOMŒOPATHIC FEVER AND AGUE SPECIFIC.

For Fever and Ague, Intermittent Fever and Ague, Dumb Ague, &c., old mismanaged bad effects of Agues treated with quinine, Chologogue, &c. This is no poisonous compound, dangerous or destructive to health, but a purely vegetable preparation, in the form of Homœopathic Sugar Pills, perfectly harmless, and yet permanently curing the Ague, often in a few days. Taken as a preventive, it perfectly preserves the system from the influence of the Ague, while traveling or residing in malarious districts. Agues of years' standing have been cured by it, after all other remedies have failed.

What say the people?

Marion, Ill., July 26, 1858.

Dr. Humphreys: Your Fever and Ague Pills have cured in every case where they have been tried. All you sent me are sold. Please send immediately six dozen boxes by express, and oblige

Yours, truly, J. M. Lewis, D. D. S.

Dr. Humphreys: Your Fever and Ague Pills have cured in all cases. J. P. Wilson, Frankfort, N. Y.

Dr. Humphreys: Your medicines have given good satisfaction here. One case of fever and ague of over two years' standing has been entirely cured by them.

Daniel Witter, South Bend, Ind.

Dr. Humphreys: Your Fever and Ague Pills have not failed to cure in any case of that disease here.

D. Sterling & Bros., Eaton Rapids, Mich.

Why will people poison themselves with quinine, arsenic, and other pernicious, nauseous and destructive drugs, when a permanent cure may be so easily obtained with Medicated Sugar Plums.

HOMŒOPATHIC PILE SPECIFIC.

For Piles or Hemorrhoids, Blind or Bleeding, Internal or External. This disease always depends upon congestion of the abdominal venous system, and hence can only be perfectly and permanently cured by medicines acting internally to relieve that congestion. This is fully accomplished by this medicine, which is the most perfect cure of this disease known.

Piles.—A gentleman of 50 years, well and favorably known at Delhi, Delaware County, N. Y., had been a martyr to the Piles for 20 years. Sometimes, from excessive hemorrhage, pain and suffering, he was reduced to the verge of the grave. For years he had dragged out a miserable existence, a confirmed invalid, disqualified for any business, and life almost a burden. It is needless to add that he had tried all sorts of remedies from all sorts of doctors to little purpose. He consulted me two years ago, and I recommended our Pile Specific, with occasionally a Dyspepsia Pill. From this he began to improve, and since has never had a serious turn of piles. From the first month up to a year past he had occasionally symptoms of his old complaint, but a few doses of the Pile Pills would disperse it all, and for more than a year past he has been entirely well of the piles. A more brilliant cure is scarcely to be found in the annals of medicine.

James H. Porter, of Amityville, N. Y., writes: One case of Piles, of over twelve years standing, was very much relieved within one week, with every prospect of a permanent cure by the use of your Pile Pills alone.

No case of Piles will fail of being benefited, and all may be cured by proper habits and perseverance in the use of this remedy.

HOMŒOPATHIC OPTHALMY SPECIFIC.

For Sore, Weak, Inflamed Eyes and Eyelids, either acute or of long standing, weak sight, deficient, blurred or failing sight. All cases of severe Sore Eyes or Weak Sight arise from some dyscrasia in the system, and hence are only cured by curing the internal disease. Hundreds have been cured of Sore and Weak Eyes by these Pills, with remarkable promptness and certainty.

Orland, Ind., Dec. 21, 1856.

Dr. Humphreys—*Sir*: I take the pen to express my gratitude to you for making medicines so valuable as yours certainly are. I have been afflicted with a weakness in my eyes for ten years, and a part of that time I have been entirely blind.

Different physicians have prescribed for me, but with little benefit. Some two years ago I went to St. Lawrence County, thinking perhaps a change of climate would be a benefit; while there I was induced to try your Opthalmia Pills. But very few of my friends knew of my taking them, as I wished to try them and be satisfied myself of their virtues, or if they were of no benefit I did not wish to be laughed at. I have now taken them seven months, and I can safely say that they have been the means of restoring my eyes to comfortable health. I can now do my own sewing, which two years ago no one ever expected.

Yours respectfully, Mary M. Smith.

HOMŒOPATHIC CATARRH SPECIFIC.

For Chronic Catarrh of long standing, Acute Catarrh or Cold in the Head, frequent Discharge from the Nose, Sneezing, Acute Choryza.

This class of disease, as is well known, is of very frequent, nay, almost universal prevalence, and the chronic forms are especially obstinate. Ordinary remedies are of very little service in effecting a cure, nor is the most boasted Inhalation any better.

This simple Remedy, only taking a Sugar Pill morning and night, promptly cures the slighter cases, and its persevering use has not failed to relieve the worst forms of Chronic Catarrh, even when so advanced as to have lost in a great degree the sense of smell.

Case.—A clergyman, aged 42, had long suffered with catarrh, which had not only been a source of annoyance, but began to excite uneasiness in regard to its effect upon his general health. There was a frequent and sometimes profuse discharge from his head, frequent sneezing, and almost an entire loss of smell. He procured a box of our Catarrhic Specific Pills, and was entirely cured, even to a return of his sense of smell, and in the course of a few weeks.

Scores of cases of perfect cures might be adduced had we space

HOMŒOPATHIC WHOOPING COUGH SPECIFIC.

This is the most mild, pleasant and safe Specific for this disease ever offered, rendering the disease mild and without danger, while it immensely shortens its course.

These Remedies are put up in large sugar pellets, in vials and boxes, and, subject only to usual atmospheric conditions, WILL RETAIN THEIR VIRTUES UNIMPAIRED FOR YEARS.
